and knowledge from emerging nations who are increasingly contributing to research that is critical for development and advancement. The role of built environment practitioners will continue to evolve by building on the sound foundations laid down by the professions and by exploiting to the full the new technologies available to us through conducting innovative research but more guidance on the research process is necessary to ensure the integrity and quality of the output. This book has been structured so that each chapter is largely free standing allowing the reader undergraduate postgraduate or practitioner to reference the material with ease. It aims to provide practical guidance on conducting research and on writing a dissertation or report and begins by considering the general research background in a built environment context. It then covers research ethics before moving on to discuss the importance of selecting the right research topic and title and writing a clear abstract. The chapters then cover introducing a research project and the authors include a section on the problem statement, research questions, aims and objectives, research gaps and motivations for the study. The book goes on to cover the literature review, section theoretical and conceptual frameworks, the various types of methodological approaches and when to apply them. The findings section, discussion of the results and the study's implications are then discussed before the final chapters cover the conclusion and recommendations. The book provides a useful reference for higher education students, graduates, postgraduates and practitioners engaged in all aspects of construction and built environment research.

Social Justice, the Common Core, and Closing the Instructional Gap Janet C. Richards, Kristien Zenkov, 2015-10-01 There is little doubt that the Common Core State Standards CCSS are a controversial entity They are provocative for the way in which they have been developed for the ways they are being implemented and evaluated for their content and for their failure to explicitly consider the needs interests and histories of diverse populations While the CCSS continue to be problematized by critics around the country

including the editors of this volume it is evident our nation is moving toward some would argue we have arrived at a national set of standards and or a national curriculum This text will be an important volume for multiple audiences in large part because it will bring together critical perspectives on the CCSS and the notion of national standards curricula It will simultaneously provide a social justice orientation as a way to interpret the CCSS and respond to their limits while presenting practical examples of social justice oriented CCSS focused curricula that empower diverse learners and their teachers Social Justice the Common Core and Closing the Instructional Gap will consist of chapters by classroom teachers and university scholars who portray honest engaging first person accounts of their successes and challenges connecting a social justice pedagogical orientation to the Common Core State Standards These authors candidly and passionately share the challenges of navigating between a social justice curriculum and high stakes standards and test driven environments They highlight their accomplishments that include effectively supporting students to consider social injustices and devise plans to work toward a more equitable world
