position as the country with the largest population Where does this attitude come from For China this situation is symbolic of the solution to the excessive population and a milestone in the Three Stage population development strategy as well as the people's hope In order to realize this hope it firstly depends on the transformation from the previous high birth rate high death rate and low growth rate of population to a high birth rate low death rate and high growth rate and finally to a low birth rate low death rate and low growth rate It also relies on the post demographic transition to a low fertility level since the 1990s and secondly is closely related to the population change in the future Therefore in depth studies on population and the development of population resources environment economy and society should be conducted on the basis of fresh experiences and theories from the international community in order to move forward with the times to promote the solution to the population problem and realize the dream of rejuvenating the Chinese nation As a result population change is linked to this great rejuvenation as the great rejuvenation requires the population change and in turn the population change facilitates the great rejuvenation
