It is important to realize that these two concepts are not identical. The first concept is the *total* value of the firm, which is the sum of the value of the firm's assets and the value of the firm's liabilities. The second concept is the *equity* value of the firm, which is the value of the firm's assets minus the value of the firm's liabilities. The two concepts are only equal if the firm has no liabilities.

Interpreting the data from the study, the researchers concluded that the findings "indicate that the study was not designed properly for weight reduction. This means it is highly important to improve the study's design, better understand obesity, and investigate effective interventions to help people lose weight and live healthier lives." The researchers also noted that the study's findings "are consistent with the findings of other studies, suggesting that the study was not designed properly for weight reduction."

During reconstruction the following issues are considered separately as well as during Phase III. However, based on the nature of the environmental interrelationships, the very same is often inevitable. Under better design, the same can be considered as part of the design process. The same is true for the same. This is a large, it involves the design of the same and the same. Some of the same are shown in the same way. The same is the same. The same is the same.
