August Strindberg's Miss Julie William Haner Leckie, 1976 Catalog of Copyright Entries Library of Congress. Copyright Office, 1972 Missing Reels Harry Waldman, 2007-10-18 During the first half of this century motion pictures were often considered disposable once their circulations were over The recycling of used film and the use of components for war efforts contributed to the loss of many movies as did the unstable nature of the nitrate film itself The loss of extant works has created gaps in the national cinematic history of the United States and most European countries Eighty percent of all Western made films produced before World War I are considered lost while 15 percent of the films made from 1930 to 1950 are also missing Here are descriptions of nearly 1 000 of the lost American and European films produced between 1900 and 1950 featuring the talents of the still famous as well as the now obscure The films are arranged by country and reveal the remarkably prolific early filmmaking in countries like the Netherlands and Sweden Each entry includes production information cast synopsis history and insights from reviews when available Photographs from these films provide glimpses of what once was An extensive index is included Catalog of Copyright Entries, Third Series Library of Congress. The Proof Stage Stephen Abbott, 2023-07-11 How playwrights from Alfred Jarry and Samuel Beckett to Tom Stoppard and Simon McBurney brought the power of mathematics to life on the stage The discovery of alternate geometries paradoxes of the infinite incompleteness and chaos theory revealed that despite its reputation for certainty mathematical truth is not immutable perfect or even perfectible Beginning in the last century a handful of adventurous playwrights took inspiration from the fractures of modern mathematics to expand their own artistic boundaries Originating in the early avant garde mathematics infused theater reached a popular apex in Tom Stoppard's 1993 play *Arcadia* In *The Proof Stage* mathematician Stephen Abbott explores this unlikely collaboration of theater and mathematics He probes the impact of mathematics on such influential writers as Alfred Jarry Samuel Beckett Bertolt Brecht and Stoppard and delves into the life and mathematics of Alan Turing as they are rendered onstage The result is an unexpected story about the mutually illuminating relationship between proofs and plays from Euclid and Euripides to Godel and *Godot* Theater is uniquely poised to discover the soulful human truths embedded in the austere theorems of mathematics but this is a difficult feat It took Stoppard twenty five years of experimenting with the creative possibilities of mathematics before he succeeded in making fractal geometry and chaos theory integral to *Arcadia*'s emotional arc In addition to charting Stoppard's journey Abbott examines the post *Arcadia* wave of ambitious works by Michael Frayn David Auburn Simon McBurney Snoo Wilson John Mighton and others Collectively these gifted playwrights transform the great philosophical upheavals of mathematics into profound and sometimes poignant revelations about the human journey
