The Finale in Western Instrumental Music Michael Talbot, 2001 The knowledge that finales are by tradition and perhaps also necessarily different from other movements has been around a long time but this is the first time that the special nature of finales in instrumental music has been examined comprehensively and in detail Three main types of finale labelled relaxant summative and valedictory are identified Each type is studied closely

with a wealth of illustration and analytical commentary covering the entire period from the Renaissance to the present day. The history of finales in five important genres: suite, sonata, string quartet, symphony and concerto is traced and the parallels and divergences between these traditions are identified. Several wider issues are mentioned including narrativity, musical rounding, inter-movement relationships and the nature of codas. The book ends with a look at the finales of all Shostakovich's string quartets in which examples of most of the types may be found.
