

Chapter 14 Highlights (cont.)

- MRP systems are designed to calculate material requirements from dependent demand items. MRP systems use backward scheduling to determine activity start dates.
- Independent demand is the demand for finished products, whereas dependent demand is demand that is derived from finished products, MRP system use dependent demand..
- The objectives of MRP are to determine the quantity and timing of material requirements and to keep schedule priorities updated and valid. MPR determines what to order, how much to order, when to place the order, and when to schedule the arrival.

Bayesian Heuristic Approach to Discrete and Global Optimization Jonas Mockus, William Eddy, Gintaras Reklaitis, 2013-03-09 Bayesian decision theory is known to provide an effective framework for the practical solution of discrete and nonconvex optimization problems This book is the first to demonstrate that this framework is also well suited for the exploitation of heuristic methods in the solution of such problems especially those of large scale for which exact optimization approaches can be prohibitively costly The book covers all aspects ranging from the formal presentation of the Bayesian Approach to its extension to the Bayesian Heuristic Strategy and its utilization within the informal interactive Dynamic Visualization strategy The developed framework is applied in forecasting in neural network optimization and in a large number of discrete and continuous optimization problems Specific application areas which are discussed include scheduling and visualization problems in chemical engineering manufacturing process control and epidemiology Computational results and comparisons with a broad range of test examples are presented The software required for implementation of the Bayesian Heuristic Approach is included Although some knowledge of mathematical statistics is

necessary in order to fathom the theoretical aspects of the development no specialized mathematical knowledge is required to understand the application of the approach or to utilize the software which is provided Audience The book is of interest to both researchers in operations research systems engineering and optimization methods as well as applications specialists concerned with the solution of large scale discrete and or nonconvex optimization problems in a broad range of engineering and technological fields It may be used as supplementary material for graduate level courses **Operations Management**
