S.

Dwivedi, 2018-10-17 The constant growth of the world's population and the decline of the availability of land and soil resources are global concerns for food security Other concerns are the decrease in productivity and delivery of essential ecosystems services because of the decline of soil quality and health by a range of degradation processes Key soil properties like soil bulk density organic carbon concentration plant available water capacity infiltration rate air porosity at field moisture capacity and nutrient reserves are crucial properties for soil functionality which refers to the capacity of soil to

perform numerous functions These functions are difficult to measure directly and are estimated through indices of soil quality and soil health Soil degradation its extent and severity can also be estimated by assessing indices of soil quality and health Geospatial Technology for Land Degradation Assessment and Management uses satellite imagery and remote sensing technologies to measure landscape parameters and terrain attributes Remote sensing and geospatial technologies are important tools in assessing the extent and the severity of land and soil degradation their temporal changes and geospatial distribution in a timely and cost effective manner The knowledge presented in the book by Dr R S Dwivedi shows how remote sensing data can be utilized for inventorying assessing and monitoring affected ecosystems and how this information can be integrated in the models of different local settings Through many land degradations studies land managers researchers and policymakers will find practical applications of geospatial technologies and future challenges The information presented is also relevant to advancing the Sustainable Development Goals of the United Nations towards global food security

Golden Thread of Time Crichton E.M Miller,2014-04-10 Time is the most important commodity on Earth we live by it and we die by it it gives order to our lives and we control all of our modern society using time and its modern instruments We think we have mastered time what if we are wrong We are told in the Bible in Genesis 1 verse 14 that our ancestors measured time by the stars and moon and we are told by evolutionists that ancient people used basic astronomy to achieve a crude understanding of time What if the war between science and religion has psychologically obscured an obvious and indisputable fact from us all If our ancestors could measure time accurately then all our science and technical achievements would have been inherited in a tree of knowledge that brought us to where we are today What if the Church in its desperate struggle to keep a profitable business alive and functioning has created such division over the ages that we do not understand the simple messages left by our ancestors on the real nature of time What if both church and crown in their pact to rule Europe obscured a scientific system inherited from Palaeolithic and Neolithic sea faring hunter gatherers that was used for thousands of years to keep time while measuring and travelling the planet and developing a philosophy that maintained a balance with Nature There is a golden thread of truth running through our history that millions cannot see but that if we did it may give us hope for our children in a world adrift without an anchor where time runs faster exploitation is rife and honesty is a bye word from a lost time imagined to be better where society cared about its people and families about their children living by rules that were easy to understand and no one old poor or disabled lived in isolation The Golden Thread of Time is designed to give hope where it does not exist providing answers where there have been none while motivating people to look beyond the mundane toward the light Do you care
