Michael Brown

Geography 2014 Mid Year Memo Grade 9:

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people **Priced Out** Rachael A. Woldoff, Lisa M. Morrison, Michael R. Glass, 2016-03-15 On an average morning in Manhattan's Stuyvesant Town housing development birds chirp as early risers dash off to work elderly residents enjoy a peaceful morning stroll and flocks of parents usher their children to school It seems an unlikely location for conflict and strife yet this eighteen block area initially planned as middle class affordable housing is the site of an ongoing struggle between long term rent regulated residents and newer market rate tenants **Priced Out** takes readers into this heated battle as a transitioning neighborhood wrestles with contemporary capitalist strategies and the struggle to preserve renters rights Attempting to replace longtime residents with younger more affluent tenants Stuyvesant Town's owners have disrupted native residents sense of place community and perceived quality of life Through interviews with residents the authors offer an intimate view into the lives of different groups of tenants involved in this struggle for prime real estate in New York from students experiencing the city for the first time to baby boomers hanging on to the vestiges of middle class urban life to older residents who have lived in Stuyvesant Town since it opened in 1947 A compelling account of changing urban landscapes and the struggle for security **Priced Out** offers a comprehensive perspective of a community that to some is becoming unrecognizable as it is upgraded and altered Page 4 of cover *The Global Testing Culture* William C. Smith, 2016-01-04 The past thirty years have seen a rapid expansion of

testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences

Learning in Morocco Charis Boutieri, 2016-04-18 *Learning in Morocco* offers a rare look inside public education in the Middle East While policymakers see a crisis in education based on demographics and financing Moroccan high school students point to the effects of a highly politicized Arabization policy that has never been implemented coherently In recent years national policies to promote the use of Arabic have come into conflict with the demands of a neoliberal job market in which competence in French is still a prerequisite for advancement Based on long term research inside and outside classrooms Charis Boutieri describes how students and teachers work within or try to circumvent the system whose contradictory demands ultimately lead to disengagement and on occasion to students taking to the streets in protest

International Mobility, Global Capitalism, and Changing Structures of Accumulation Anthony P. D'Costa, 2015-11-19 International mobility is not a new concept as people have moved throughout history voluntarily and forcibly for personal familial economic political and professional reasons Yet the mobility of technical talent in the global economy is relatively new largely voluntary structurally determined by market forces and influenced by immigration policies With over a decade s worth of extensive research in India Japan Finland and Singapore this book provides an alternative understanding of how capitalism functions at the global level by specifically analyzing the international movement of technical professionals between India and Japan There are three factors that inform this study the services transition away from manufacturing the movement of technical professionals in the world economy and the demographic crisis facing Japan The dynamics of changing capitalism are examined by theorizing the emergence of the services sector in the USA and Japan analyzing the pronounced social inequality in India that is the basis for the global supply of highly skilled technical professionals and providing considerable empirical data on the flows of professionals to these two countries to indicate Japan s institutional inflexibility in accommodating foreign talent The author anticipates that Japanese industry will shed some of its institutional rigidity due to the pressures of competition and the scarcity of technical professionals Providing a wealth of information on the topic of international mobility this book is an essential addition for scholars and students in the field of International Development Business Studies Asian Studies Migration Studies and Political Economy **Class in the New Millennium** Will Atkinson, 2017-02-17 *Class in the New Millennium* paints a fresh and comprehensive picture of social class in Britain today Anchored in a broad repertoire of methods and pursuing a distinctive theoretical agenda it not only painstakingly maps the structure transformation and effects of the UK s key fault lines but goes behind closed doors to see how they play out in

everyday family life Throughout the book Atkinson throws new light on a diverse array of themes including the continued effects of deindustrialisation educational expansion feminisation of the workforce and surging employment insecurity the persistence of lifestyle cleavages despite cultural and technological change the growth of political disengagement the transformation of the Labour Party and the rise of nationalism the entwinement of class with space place and physical movement and the way in which class interacts with intimate relations to shape not just the way we decorate our walls or talk over the dining table but the very reproduction of the class structure itself This innovative title will appeal to scholars as well as advanced undergraduate and postgraduate students interested in the fields of sociology politics and political science cultural studies cultural geography social policy and social work

The Neoliberal Diet Gerardo Otero, 2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United States and beyond While some claim that people simply eat too much energy dense food while exercising too little The Neoliberal Diet argues that the issue is larger than individual lifestyle choices Since the 1980s the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo Otero identifies the socioeconomic and political forces that created this diet which has been exported around the globe at the expense of people's health Otero shows how state level actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices Resolving the global obesity crisis Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all
