One Hundred Days of Silence Jared A. Cohen, 2006-12-28 One

Hundred Days of Silence is an important investigation into the 1994 Rwandan genocide and American foreign policy. During one hundred days of spring, eight hundred thousand Rwandan Tutsis and sympathetic Hutus were slaughtered in one of the most atrocious events of the twentieth century. Drawing on declassified documents and testimony of policy makers, Jared Cohen critically reconstructs the historical account of tacit policy that led to nonintervention. His analysis examines the questions of what the United States knew about the genocide and how the world's most powerful nation turned a blind eye. The study reveals the ease at which an administration can not only fail to intervene but also silence discussion of the crisis. The book argues that despite the extent of the genocide, the American government was not motivated to act due to a lack of economic interest. With precision and passion, *One Hundred Days of Silence* frames the debate surrounding this controversial history.

A Practice of Ethics for Global Politics Jack L. Amoureux, 2015-10-05

What kind of ethics in world politics is possible if there is no foundation for moral knowledge or global reality is at least complex and contingent. Furthermore, how can an ethics grapple with difference, a persistent and confounding feature for global politics? This book responds to the call for a bold and creative approach to ethics that avoids assuming or aspiring to universality and instead prioritizes difference, complexity, and uncertainty by turning to reflexivity not as method or methodology but as a practice of ethics for politics. This practice of ethical reflexivity offers individuals, organizations, and communities tools to recognize, interrogate, and potentially change the stories they tell about politics, about constraints, notions of responsibility, and visions of desirability. The benefits and limits of ethical reflexivity are investigated by the author, who engages writing on critique, rhetoric, affect, and relationality and carefully considers dominant and alternative framings of difficult issues in International Relations (IR), the 1994 genocide in Rwanda, and the US policies of enhanced interrogation and drone strikes. This path-breaking study provokes new possibilities for agency and action and contributes to a growing literature in IR on reflexivity by uniquely elaborating its promise as an ethics for politics and by drawing on thinkers less utilized in discussions of reflexivity, such as Hannah Arendt, Michel Foucault, and Aristotle. This book will appeal to scholars and upper-level graduates in several sub-fields of IR, including international global ethics, IR theory, global governance, international organizations, non-governmental organizations, foreign policy analysis, and US foreign policy.
