Scherer, 2016-06-06 This thesis offers an accessible guide to biomedical phase contrast imaging with over 20 radiographic illustrations It focuses on research to improve radiography and particularly mammography applications by using a novel X ray imaging modality that exploits the wave nature of X rays rather than just their absorption in tissue Further it explores a broad range of potential applications from the assessment of breast cancer and the evaluation of microcalcification clusters to the examination of renal stones X ray imaging is an indispensable tool in modern medical diagnostics and ranges from simple radiography applications to advanced CT imaging protocols This novel phase contrast approach has the potential to deliver significantly improved diagnostic information also and especially in cases where mammography is used for screening purposes The thesis is based on several studies conducted by the author working in close interdisciplinary cooperation with medical doctors at two university clinics in Munich and successfully demonstrates this diagnostic potential in pre clinical

Engineering the triennial scientific meeting of the IUPESM is the world's leading forum for presenting the results of current scientific work in health-related physics and technologies to an international audience. With more than 2,800 presentations, it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009. Medical physics, biomedical engineering, and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and therapeutics, it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro and nanosystems, optics, and biotechnology, the congress will serve as an inter- and multidisciplinary platform that brings together people from basic research, R&D, industry, and medical application to discuss these issues. As a major event for science, medicine, and technology, the congress provides a comprehensive overview and in-depth, first-hand information on new developments, advanced technologies, and current and future applications. With this Final Program, we would like to give you an overview of the dimension of the congress and invite you to join us in Munich. Olaf Dössel, Congress President, Wolfgang C
