Becoming Literate in Mathematics and Science ,2001 **Theoretical Nursing** Afaf Ibrahim Meleis,2011 An
additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate
programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the
knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice
Because of these assumptions most of the early writing about theory development was about outlining strategies that should
be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not
uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes
that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption
was made that there should be a single strategy for theory development some claiming to begin the process from practice
and others believing it should be driven by research Provided by publisher Maternal and Child Health Nursing Adele
Pillitteri,2013-11-25 Adele Pillitteri aims to ensure that today s students have a technical understanding without losing the

importance of compassion in their role as a nurse The text presents pediatrics and maternity as a continuum of knowledge taking a holistic approach and viewing maternity and pediatric content as a family event The text links theory closely with application that helps students gain a deeper understanding of content and be better prepared to practice in their careers Provided by publisher Theoretical Nursing Afaf Ibrahim Meleis,2007 This text guides you through the evolution of nursing s theoretical foundations and examines the ways in which these principles influence the practice of the discipline
