Earth’s Troubled, Angry Sea”: The History of Christian Science in the United States Rolf Swensen, 2025-05-21
Christian Science is one of the most unique and controversial of American religions but there has never been a history of this influential metaphysical group best known for its healing through prayer Most attention has previously focused on the church s founder Mary Baker Eddy 1821 1910 This compilation of nine previously published scholarly articles buttressed by additional insight presented in the preface introduction and conclusion should lead to further investigation of this compelling topic This volume investigates the origins of the Christian Science movement illustrates how Eddy s students mainly women helped its rapid spread through healings how Eddy guided and restrained her students examines some denominational growing pains underscores how The Mother Church in Boston and Eddy s Church Manual evolved recounts dozens of testimonies of healing and shows how local or branch churches operated before and after Eddy s passing Contrary to previous assumptions the new Christian religion was surprisingly diverse with almost one half of the membership coming from the lower middle and working classes This vibrant church ultimately declined due to excessive centralization and

insufficient utilization of the membership plus lack of social activities and the rise of medical science Recent efforts to revitalize the movement through embracing communities are continuing And Over Earth's Troubled Angry Sea The History of Christian Science in the United States will appeal to Christian Scientists kindred spirits in the metaphysical world anyone interested in religion and those who read social history Each chapter is suitable for group discussions and for undergraduate or graduate classes *Holt Science: Teacher's edition* Joseph Abruscato,1989 Apprehension Lynn Holt,2018-10-24 This title was first published in 2002 This work introduces and explores the role of apprehension in reasoning setting out the problems determining the vocabulary fixing the boundaries and questioning what is often taken for granted The author argues that a robust conception of rationality must include intellectual virtues which cannot be reduced to a set of rules for reasoners and argues that the virtue of apprehension an acquired disposition to see things correctly is required if rationality is to be defensible Drawing on an Aristotelian conception of intellectual virtue and examples from the sciences the author shows why impersonal standards for rationality are misguided why foundations for knowledge are the last elements to emerge from inquiry not the first and why intuition is a poor substitute for virtue By placing the current scene in historical perspective the author displays the current impasse as the inevitable outcome of the replacement of intellectual virtue with method in the early modern philosophical imagination *Te HS&T J* Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2004-02 **Te HS&T 2007 Shrt Crs M** Holt Rinehart & Winston,2007 *A Place Like No Other* Anthony R. E. Sinclair,René Beyers,2021-10-19 With its biodiversity astounding megafauna and great animal migrations the Serengeti is like no other ecosystem in Africa or indeed the world It is also one of the most well studied places and perhaps no scientist has contributed more to our understanding of the Serengeti than Tony Sinclair who has been researching this region since 1965 In this book Sinclair recounts his quest to understand how the Serengeti works and what this unique place can tell us about how other ecosystems work and how they might even be repaired *Superintendent's Bulletin* Santa Clara County (Calif.). Office of Superintendent of Schools,1962-10
