The U.S. Air Force relies on RDT&E to support the development of new technologies, programs, and systems. The Air Force's RDT&E program is organized into three main areas: research, development, and testing. Research is the process of discovering new knowledge and understanding the fundamental principles of science and technology. Development is the process of creating new products, systems, or processes. Testing is the process of evaluating the performance and reliability of a product, system, or process. The Air Force's RDT&E program is organized into three main areas: research, development, and testing.
