**Non-Western Theories of International Relations** Alexei D. Voskressenski,2016-12-16 This book addresses the problem of World Regional Studies and its components regional complexes regional subsystems and global regions With an increasingly complex international system and the emergence of new actors it is clear that the conceptual framing within the classical disciplines of IR Political Theory International Political Economy or Comparative Politics can no longer fully explain a number of processes originating from a tighter and intricate nexus between local regional and global dimensions World Regional Studies explains the emergence of new phenomena in international relations and world politics on a regional and predominantly non Western regional level How do non Western societies react to the transformations of the global order Is a non Western democracy possible Should we discuss the possibilities for the appearance of a non Western IR theory or a new framework for analyzing de westernized global development This study based on decade long research and teaching post in World Regional Studies at MGIMO University and Russian University of Humanitarian Studies RGGU seeks to answers these questions **A Geography of Digestion** Nicholas Bauch,2016-11-08 A Geography of Digestion explores the legacy of the Kellogg Company one of America s most enduring and storied food enterprises In the late nineteenth century company founder John H Kellogg was experimenting with state of the art advances in nutritional and medical science at his Battle Creek Sanitarium At the same time he was involved in overhauling the form and function of the broader landscapes in which his health practice was situated Innovations in food manufacturing machinery urban sewer infrastructure and agricultural technology came together to forge an extensible geography of his patients bodies changing the way Americans consumed and digested food In this novel approach to the study of the Kellogg enterprise Nicholas Bauch asks his readers to think geographically about the process of digesting food Beginning with the stomach Bauch moves outward from the sanitarium through the landscapes and technologies that materialized Kellogg s particular version of digestion Far from a set of organs confined to the epidermal bounds of the body the digestive system existed in other places Moving from food processing machines to urban sewerage to agricultural fields A Geography of Digestion paints a grounded portrait of one of the most

basic human processes of survival the incorporation of food into our bodies leading us to question where exactly our bodies are located Provided by publisher *Human Geography* Professor and Head of Geography William Norton, William Norton, 2011-04-06 Human Geography explores how human behaviour affects the earth's surface In the course of this exploration the text engages with subjects such as globalization politics biology economics philosophy cultural studies sociology and global warming Illustrated with a well balanced mix of international and Canadian examples Human Geography offers a comprehensive introduction to the discipline's essential concepts and methods It also traces the evolution of the field emphasizing how human geography continues to develop in response to changing human needs In response to the changing facts of human geography and to changing understandings of those facts the seventh edition is changed from the sixth edition in four substantive ways First there is much new content both in the form of some new sections and also new material added to existing discussions Second there is an increased emphasis on providing information for students in easily readable ways though the addition of new figures tables and boxes through the redrawing of all of the maps and through an enhanced listing of helpful websites at the end of each chapter Third much of the detailed factual content in this seventh edition is new especially relating to topics such as environmental change population political developments and economic change Finally the entire text has been revised for clarity and readability and a number of errors have been corrected *The Glasgow University Calendar...* University of Glasgow, 1967 *Canadiana*, 1990 *Books for College Libraries: Social sciences* Association of College and Research Libraries, 1988 This third edition lists 50 000 titles that form the foundation of an undergraduate library's collection This volume covers the social sciences University of Glasgow Calendar University of Glasgow, 1967 **21st Century Sociology: A Reference Handbook** Clifton D. Bryant, Dennis L. Peck, 2007 Publisher Description **Property and Human Flourishing** Gregory S. Alexander, 2018-02-26 Many people assume that what morally justifies private ownership of property is either individual freedom or social welfare defined in terms of maximizing personal preference satisfaction This book offers an alternative way of understanding the moral underpinning of private ownership of property Rather than identifying any single moral value this book argues that human flourishing understood as morally pluralistic and objective is property's moral foundation The book goes on to develop a theory that connects ownership and human flourishing with obligations Owners have obligations to members of the communities that enabled the owners to live flourishing lives by cultivating in their community members certain capabilities that are essential to leading a well lived life These obligations are rooted in the interdependence that exists between owners and their community members and inherent in the human condition Obligations have always been inherent in ownership Owners are not free to inflict nuisances upon their neighbors for example by operating piggeries in residential neighborhoods The human flourishing theory explains why owners at times have obligations that enable their fellow community members to develop certain necessary capabilities such as health care and security This is why for example farm owners may be required to allow

providers of health care and legal assistance to enter their property to assist employees who are migrant workers Moving from the abstract and theoretical to the practical this book considers implications for a wide variety of property issues of importance both in the literature and in modern society These include questions such as When is a government s expropriation of property legitimated for the reason it is for public use May the owner of a historic or architecturally significant house destroy it without restriction Do institutions that owned African slaves or otherwise profited from the slave trade owe any obligations to members of the African American community What insights may be gained from the human flourishing concept into resolving current housing problems like homelessness eviction and mortgage foreclosure
