Harris, 2013-05-13 Bringing together several key elements needed to identify the most promising themes for future research in selection and classification this book's underlying aim is to improve job performance by selecting the right persons and matching them most effectively with the right jobs An emphasis is placed on current innovative research

approaches which in some cases depart substantially from traditional approaches The contributors consisting of professionals in measurement personnel research and applied and military psychology discuss where the quantum advances of the last decade should take us further Comprehensive coverage of the selection and classification domain is provided including a broad range of topics in each of the following areas performance conceptualization and measurement individual differences and selection and classification decision models The presentations in each of these areas are integrated into a set of coherent themes This integration was the product of structured group discussions which also resulted in a further evolution of some of the ideas presented National Library of Medicine Current Catalog National Library of Medicine (U.S.),1965 *The Supervisor's Guidebook* Dennis H. Reid,Marsha B. Parsons,Carolyn W. Green,2025-03-20 This guidebook will show how supervisors can ensure support staff to deliver quality services for people with disabilities whose quality of life is heavily dependent on how well those services are provided Supervisors must ensure staff receive necessary training in their job duties are actively supported to stay motivated to work proficiently and at times effectively assisted to improve their work performance Over the last five decades a technology for supervising staff work performance in the human services has been evolving derived from applied research conducted in many human service agencies However most supervisors have not had opportunities to become aware of these evidence based means of fulfilling their supervisory duties The purpose of The Supervisor s Guidebook is to describe the existing evidence based approach to supervision A description of the approach is supplemented with practical suggestions based on the authors combined experience encompassing over 100 years of supervising staff performance in the human services The intent is to provide supervisors with detailed information about tried and tested means of promoting diligent and proficient staff performance and to do so in a way that maximizes staff enjoyment with their work This new third edition has been extensively revised and a new chapter has been added on Culturally Responsive Supervision on supervising staff performance with awareness and consideration of varying cultural preferences and practices of individual staff **The Manager's Guide to Systems Practice** Frank Stowell,Christine Welch,2012-05-24 This book is an ideal resource on the subject of systems practice for busy managers whose time is scarce It provides a rapid introduction to straightforward yet powerful ideas that enable users to address real world problems Systems theory and practice is predominantly a framework for thinking about the World in which holistic views are maintained In this respect it contrasts with some familiar techniques of management science in which problem situations are broken down into their constituent parts with resultant loss of coherence **Self-Motivation for Professional Practitioners** Dennis H. Reid,2022-04-04 For professional practitioners in the human services to successfully fulfill their important job roles they must be highly motivated In many human service agencies however practitioners encounter situations that can seriously impede their motivation to work diligently as well as reduce their enjoyment on the job For example working with limited resources unrealistic caseloads problematic supervision or interfering events beyond an agency s control e g the COVID 19

pandemic can all reduce practitioner motivation and work enjoyment This book describes how human service practitioners can achieve and maintain self motivation to be professionally productive and experience enjoyment on the job during both the best and worst of times Self motivation is presented in terms of practitioners actively using strategies developed through research and application in behavior analysis and therapy to promote their work productivity and enjoyment Self motivation strategies presented are likewise based on the specific advice of highly successful practitioners in the human services Some strategies presented are robust in nature in that they can be applied across varying situations to promote self motivation and enhance overall quality of work life Other strategies are more situation specific being tailored to overcoming particular obstacles to motivation that practitioners often face in human service agencies The intent of this book is to provide practical information that effectively equips practitioners to be in control of their work motivation and thereby work consistently in a manner that is professionally productive and personally enjoyable

Managing the Human Factor Bruce E. Kaufman, 2019-06-30

Human resource departments are key components in the people management system of nearly every medium to large organization in the industrial world. They provide a wide range of essential services relating to employees including recruitment, compensation, benefits, training, and labor relations. A century ago, however, before the concept of human resource management had been invented, the supervision and care of employees at even the largest companies were conducted without written policies or formal planning and often in harsh, arbitrary, and counterproductive ways. How did companies such as United States Steel manage a workforce of 160,000 employees at dozens of plants without a specialized personnel or industrial relations department? What led some of these organizations to introduce human resources practices at the end of the nineteenth century? How were the earliest personnel departments structured and what were their responsibilities? And how did the theory and implementation of human resources management evolve both within industry and as an academic field of research and teaching? In *Managing the Human Factor*, Bruce E. Kaufman chronicles the origins and early development of human resource management (HRM) in the United States from the 1870s when the Labor Problem emerged as the nation's primary domestic policy concern to 1933 and the start of the New Deal. Through new archival research, an extensive review and synthesis of the historical and contemporary literatures, and case studies illustrating best and worst practices during this period, Kaufman identifies the fourteen ideas, events, and movements that led to the creation of specialized HRM departments in the late 1910s as well as their further growth and development into strategic business units in the welfare capitalism period of the 1920s. The research presented in this book not only uncovers many new aspects of the early development of personnel and industrial relations but also challenges central parts of the contemporary interpretation of the concept and evolution of HRM. Rich with insights on both the present and past of human resource management, *Managing the Human Factor* will be widely regarded as the definitive account of the early history of employee management in American companies and a must read for all those interested in the indispensable function of managing people in organizations.
