

THERMOSTAT OPERATION — COMFORT IS AT YOUR FINGERTIPS

Though your thermostat may vary somewhat from the description below, its operation will be similar.

TEMPERATURE LEVELS

Set the indicator (lever or dial) to the desired temperature responses for both heating and cooling.

FAN SWITCH

In AUTO or FAN mode, the blower operates only when the thermostat calls for heating or cooling. This mode is generally preferred when humidity control is a priority. The ON or CONT mode provides continuous indoor blower operation, regardless of whether the compressor or burners are operating. This mode is required when constant air circulation or filtering is desired.

SYSTEM SWITCH

Set the system switch for heating, cooling or auto operation. The auto mode allows the system to automatically switch from heating mode to cooling mode to maintain predetermined comfort settings.

TEMPERATURE INDICATOR

The temperature indicator displays the actual room temperature.

PROGRAMMABLE THERMOSTATS

Your Lennox system may be controlled by a programmable thermostat. These thermostats provide the added features of programmable responses for both heating and cooling. Refer to the user's information manual provided with your particular thermostat for operation details.

BEFORE YOU CALL

If your system fails to operate, check the following before calling for service:

- Check to see that all electrical disconnect switches are ON.
- Make sure the main thermostat temperature setting is properly set.
- Make sure the main thermostat system switch is properly set.
- Replace any blown fuses or reset circuit breakers.
- Make sure unit access panels are in place.
- Make sure air filter is clean.
- Locate unit model number and have it handy before calling.
