### Macros Explained

One of the powerful features of *inVoca* is its ability to utilize "macros." A macro is simply a sequence of commands triggered by a single button push or spoken word. A simple macro might be "0" followed by "7" followed by "Enter" (for tuning your TV) reduced by a macro to a single command such as "ABC" or "Millionaire."

A more complex macro would allow you to play a VCR tape. To do this the old fashioned way you would need to press "TV" then "Power" then "0" then "3" then "VCR" then "power" then "play." A macro would allow you to do all this with a single spoken command such as "play tape." Isn't that easier? "Multiple String Macros," explained on page 30, permit you to do such things as surf between three or four channels with a single command — very handy for watching New Year's Day football!
