Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Rose Mary Zbiek, Glendon W. Blume, M. Kathleen Heid, 2018-01-01 The depth and breadth of a mathematics teacher s understanding of mathematics matter most as the teacher engages in the daily work of teaching One of the major challenges to teachers is to be ready to draw on the relevant mathematical ideas from different areas of the school curriculum and from their postsecondary mathematics experiences that can be helpful in explaining ideas to students making instructional decisions creating examples and engaging in other aspects of their daily work Being mathematically ready and confident requires teachers to engage in ongoing professional learning that helps them to connect mathematics to events like those they live on

a daily basis The purpose of this volume is to provide teachers teacher educators and other facilitators of professional learning opportunities with examples of authentic events and tools for discussing those events in professional learning settings The work shared in Facilitator s Guidebook for Use of Mathematics Situations in Professional Learning Guidebook resulted from a collaborative effort of school mathematics supervisors and university mathematics educators The collaborators joined their varied experiences as teachers coaches supervisors teacher educators and researchers to suggest ways to scaffold activities encourage discussion and instigate reflection with teacher participants of differing mathematics backgrounds and with varying teaching assignments Each guide has ideas for engaging and furthering mathematical thought across a range of facilitator and participant mathematics backgrounds and draws on the collaborators uses of the Situations with in service and prospective teachers The events and mathematical ideas connected to each event come from Situations in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations A Situation is a description of a classroom related event and the mathematics related to it For each of six Situations school and university collaborators developed a facilitator s guide that presents ideas and options for engaging teachers with the event and the mathematical ideas The Guidebook also contains suggestions for how teachers and others might develop new Situations based on events from their own classrooms as a form of professional learning Both teacher educators and school based facilitators can use this volume to structure sessions and inspire ideas for professional learning activities that are rooted in the daily work of mathematics teachers and students

OSullivan,2014-10-25 **I See What You Mean** Steve Moline,2023-10-10 Some educators may view diagrams pictures and charts as nice add on tools for students who are visual thinkers But Steve Moline sees visual literacy as fundamental to learning and to what it means to be human In Moline s view we are all bilingual Our second language which we do not speak but which we read and write every day is visual From reading maps to decoding icons to using concept webs visual literacy is critical to success in today s world The first edition of I See What You Mean published in 1995 was one of

the first books for teachers to outline practical strategies for improving students visual literacy In this new and substantially revised edition Steve continues his pioneering role by including dozens of new examples of a wide range of visual texts from time maps and exploded diagrams to digital tools like smartphone apps and tactile texts In addition to the new chapters and nearly 200 illustrations Steve has reorganized the book in a useful teaching sequence moving from simple to complex texts In one research strategy called recomposing Steve shows how to summarize paragraphs of information not as a heap of interesting facts but as a diagram The diagram can then work as a framework for students to follow when writing an essay This overcomes the teacher s problem of cut and paste essays and by following their own diagram summary students have an answer to their familiar questions Where do I start What do I write next
