The Right to Life in Armed Conflict Ian Park, 2018-02-15 The application of the right to life during armed conflict is an issue that polarizes opinion and generates considerable debate Many believe that human rights law has no place in armed conflict yet the European Court of Human Rights and domestic courts have ruled that it can apply The exact contours of how the right to life applies during armed conflict remain largely unresolved In this text Ian Park seeks to clearly articulate the right to life obligations of states during both international and non international armed conflict in respect of those individuals affected by the actions of states armed forces and members of the armed forces themselves In determining the right to life obligations of states Park identifies the sources of law from which right to life obligations arise how case law has developed and modified these obligations and analyses how the law creates obligations in practice Implicit in this analysis is a consideration of recent armed conflicts and the actions of states that lead to a series of concrete proposals designed to best ensure compliance with a state's right to life obligations

British Air Power Viktoriya Fedorchak, 2018-09-20 *British Air Power* demonstrates how the Royal Air Force sought to adapt in regard to the roles it could play and the conflicts in which it could be used as well as the evolution of air power doctrine at a time of rapid changes in national politics and in the international arena The development of new concepts and theories the evaluation of operational experience the political environment and budgetary cuts and the role of academics and personalities in development of doctrine are thus all explored to show changes in strategic thinking regarding air power Fedorchak further examines the influence of jointery the process of co operation between the army navy and air force on thinking conceptualising teaching and using air power in recent operations in Afghanistan Iraq Libya and Syria A contemporary complement to more historical studies *British Air Power* provides a very detailed look at the development of air land doctrine in the RAF since the turn of the century

Understanding the Intelligence Cycle Mark Phythian, 2013-07-18 This book critically analyses the concept of the intelligence cycle highlighting the nature and extent of its limitations and proposing alternative ways of conceptualising the intelligence process The concept of the intelligence cycle has been central to the study of intelligence As Intelligence Studies has established itself as a distinctive branch of Political Science it has generated its own foundational literature within which the intelligence cycle has constituted a vital thread one running through all social science approaches to the study of intelligence and constituting a staple of professional training courses However there is a growing acceptance that the concept neither accurately reflects the intelligence process nor accommodates important elements of it such as covert action counter intelligence and oversight Bringing together key authors in the field the book considers these questions across a number of contexts in relation to intelligence as a general concept military intelligence corporate private sector intelligence and policing and criminal intelligence A number of the contributions also go beyond discussion of the limitations of the cycle concept to propose alternative conceptualisations of the intelligence process What emerges is a plurality of approaches that

seek to advance the debate and as a consequence Intelligence Studies itself This book will be of great interest to students of intelligence studies strategic studies criminology and policing security studies and IR in general as well as to practitioners in the field **Air Warfare** Peter Gray,2015-11-19 Air Warfare provides an introduction to the subject s theory history and practice As well as delivering an up to date look at the strategy and historiography of air power Peter Gray explores the theories behind air power and looks at the political legal and moral dimensions of the application of air power Topics covered include Key military strategists and their legacy Air power s strategic effects Leadership management and command Tactics technology and operations The book draws on primary sources including official narratives and published reports examines key thinkers in the study of air power and discusses topics such as concepts of warfare as an art or science cultural perceptions of air power and the experience of being an airman With its broad scope and thorough coverage of a range of key topics Air Warfare takes air power beyond the study of individual campaigns or controversies providing a multi disciplinary approach to air power studies **Fratricide in Battle** Charles Kirke,2012-04-26 This collection examines the subject of friendly fire through the eyes of international experts in the field *American Lawn Tennis* ,1921 **The Concept of Military Objectives in International Law and Targeting Practice** Agnieszka Jachec-Neale,2014-10-24 The concept that certain objects and persons may be legitimately attacked during armed conflicts has been well recognised and developed through the history of warfare This book explores the relationship between international law and targeting practice in determining whether an object is a lawful military target By examining both the interpretation and its post ratification application this book provides a comprehensive analysis of the definition of military objective adopted in 1977 Additional Protocol I to the four 1949 Geneva Conventions and its use in practice Tackling topical issues such as the targeting of TV and radio stations or cyber targets Agnieszka Jachec Neale analyses the concept of military objective within the context of both modern military doctrine and the major coalition operations which have been undertaken since it was formally defined This monograph will be of great interest to students and scholars of international law and the law of armed conflict as well as security studies and international relations **The Quest of the Davis Cup** Stephen Wallis Merrihew,1928 *Revision of Ufens Girault, 1911 (Hymenoptera: Trichogrammatidae)* Albert K. Owen,2011-11 The first worldwide revision of the wasp genus Ufens Girault 1911 Hymenoptera Trichogrammatidae Oligositinae is presented Ufens is known to parasitize primarily hemipteran eggs and is a cosmopolitan genus most common in temperate and semi arid regions such as the southwestern United States and Australia Forty three species are recognized here Included in the revision are five species formerly in the genus Ufensia herein synonymized and 32 new species In addition seven species are removed from Ufens and placed in renewed combination in Mirufens Because thirteen nominal species remain unidentifiable they are treated as nomina dubia A worldwide key to species is provided A preliminary phylogenetic hypothesis is presented utilizing both molecular and morphological data in maximum parsimony analysis Molecular data however are limited to twelve of the recognized species

Thirty seven morphological characters were utilized both alone and together with molecular data. Due to greater confidence in molecular results and overall lack of resolution, the results of the paired down molecular plus morphological analysis were utilized as a backbone for analyzing the complete morphological data set. Overall results are inconclusive with few relationships consistently recovered. There does appear to be a Holarctic clade but even this result is tenuous.
