housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us
