Miller,2021-12-10 Can the study of religion be justified Scholarship in religion especially work in theory and method is preoccupied with matters of research procedure and thus inarticulate about the goals that motivate scholarship in the field For that reason the field suffers from a crisis of rationale Richard B Miller identifies six prevailing methodologies in the field and then offers an alternative framework for thinking about the purposes of the discipline Shadowing these various methodologies he notes is a Weberian scientific ideal for studying religion one that aspires to value neutrality This ideal fortifies a regime of truth that undercuts efforts to think normatively and teleologically about the field s purpose and value Miller s alternative framework Critical Humanism theorizes about the ends rather than the means of humanistic scholarship Why Study Religion offers an account of humanistic inquiry that is held together by four values Post critical Reasoning Social Criticism Cross cultural Fluency and Environmental Responsibility Ordered to such purposes Miller argues scholars of religion can relax their commitment to matters of methodological procedure and advocate for the value of studying religion The future of religious studies will depend on how well it can articulate its goals as a basis for motivating scholarship in the field Teaching Religion and Healing Linda L. Barnes,Inés M. Talamantez,2006-10-12 The study of medicine and healing traditions is well developed in the discipline of anthropology Most religious studies scholars however continue to assume that medicine and biomedicine are one and the same and that when religion and medicine are mentioned together the reference is necessarily either to faith healing or bioethics Scholars of religion also have tended to assume that religious healing refers to the practices of only a few groups such as Christian Scientists and pentecostals Most are now aware of the work of physicians who attempt to demonstrate positive health outcomes in relation to religious practice but few seem to realize the

myriad ways in which healing pervades virtually all religious systems This volume is designed to help instructors incorporate discussion of healing into their courses and to encourage the development of courses focused on religion and healing It brings together essays by leading experts in a range of disciplines and addresses the role of healing in many different religious traditions and cultural communities An invaluable resource for faculty in anthropology religious studies American studies sociology and ethnic studies it also addresses the needs of educators training physicians health care professionals and chaplains particularly in relation to what is referred to as cultural competence the ability to work with multicultural and religiously diverse patient populations **The Future of Peace and Justice in the Global Village** Thomas R.
