## 'Misleading Logic'

To the Editor of The Tribune:

On Monday The Tribune reprinted an article from the Editor and Publisher magazine by a Mr. Herbert Franks, advertising director of an Atlanta, Georgia, newspaper. Fanning over Mr. Franks' self-righteous defenses of advertising media, his political and economic observations contain precisely the sort of slick and misleading logic that has caused the public to be suspicious of politicians of his profession.

Aside from his defense of advertising, Franks evidently has only two points to make. The first deals with the political position of Senator John F. Kennedy that we should expand the public sector of our economy at the expense of the private sector; Franks labels this a "classic and complete example" of socialism.

### "Simply Wrong"

In this Franks is simply wrong. Socialism, whether he likes the definition or not, is the government ownership of the means of production. Neither of the two major parties is advocating that we nationalize the steel industry, or the television industry, or whatever. Words do have meanings, after all, and advertising directors would be well-advised to use them properly.

Franks' second point which is rather disconcertingly inconsistent with his first seems to be that we cannot in any case reallocate resources from the private to the public economy. "What kind of impractical and theoretical paper work is this," he asks, "which transfers money not spent on an individual purchase into money available for public use here? If I don't buy a cigar, does that saving go toward someone's education or his wages?"

The answer Mr. Franks intends is no, but the correct answer is yes. When Mr. Franks dies without his cigar

money, the City of Atlanta has lost the money away from him in order to build schools, he is clearly paying for "someone's education." His stomach of breakfast will show this without fail.

Rather than escape in the sort of wretched nonsense that Mr. Franks seems to favor, the American people might do well to consider the critical nature of the forthcoming election. According to a recent study done by the Central Intelligence Agency and released by the Joint Economic Committee of the United States Congress, between 1950 and 1959 industrial production in the U.S. increased by 41 per cent. During the same period industrial production in the U.S.S.R. went up 129 per cent, and in the People's Republic of China industrial production in the U.S.S.R. went up by 100 per cent. CIA estimated that between 1950 and 1955 industrial production in the U.S. will rise by 30 per cent; in the U.S.S.R. by 68 per cent; and communist China by 118 per cent.

### Better Performance

If we are to maintain the strength of the western alliance, our economic performance in the future must be far better than in the past. This is the challenge that confronts America. It will not be met by more advertising; it will only be met by greater sacrifice — going without consumer goods in order to build our industrial plants.

If we cannot pay scholars as much as football players; if we cannot give up toll fees for decent highways; if we cannot go without TV spectacles in order to help the peoples of South America, Asia and Africa achieve the measure of the good life; if, in short, we cannot or will not rise to meet this challenge, then Korea

will have us. Sincerely yours, Dudley G. Lusk, 2241 15th Road

*Logic of Feeling* Luke Munn, 2020-12-04 From the virulence of fake news to the rise of psychographic profiling emotion has become ascendant The new frontier of capitalization is not outward but inward the inner life of affect and emotion desire and disposition This book lays that new reality out with a series of close case studies A new set of technologies are emerging from facial coding to affective computing that attempt to render the emotional into the machine readable At the same time social media and smart home devices are becoming empathic attempting to draw out our affective participation and elicit our emotional expression In these encounters with the medial and the technical the emotional is remade Combining a close analysis of contemporary technologies such as Affectiva Facebook and Alexa with critical media theory *Logic of Feeling* Technology's Quest to Capitalize Emotion examines how the quest to operationalize this inner life begins to reconfigure feeling itself

Educating for Critical Consciousness George Yancy, 2019-04-23 In this politically and democratically urgent collection George Yancy and contributors argue that more than ever we are in need of classrooms that function dangerously that is classrooms where people are not afraid to engage in critical discussions that call into question difficult political times Collectively they demonstrate the ways activist authors and scholars must be prepared to engage in risk and vulnerability as a defense of our democratic right to practice forms of pedagogical transgression Ideal for scholars and students of critical pedagogy philosophy of education and political theory this collection delineates the necessity of critical consciousness through education and provides ways of speaking back against authoritarian control of imaginative and critical capacities

The Mystery of Rationality Gérald Bronner, Francesco Di Iorio, 2018-07-12 This book contributes to the developing dialogue between cognitive science and social sciences It focuses on a central issue in both fields i e the nature and the limitations of the rationality of beliefs and action The development of cognitive science is one of the most important and fascinating intellectual advances of recent decades and social scientists are paying increasing attention to the findings of this new branch of science that forces us to consider many classical issues related to epistemology and philosophy of action in a new light Analysis of the concept of rationality is a leitmotiv in the history of the social sciences and has involved endless disputes Since it is difficult to give a precise definition of this concept and there is a lack of agreement about its meaning it is possible to say that there is a mystery of rationality What is it to be rational Is rationality merely instrumental or does it also involve the endorsement of values i e the choice of goals Should we consider rationality to be a normative principle or a descriptive one Can rationality be only Cartesian or can it also be argumentative Is rationality a conscious skill or a partly tacit one This book which has been written by an outstanding collection of authors including both philosophers and social scientists tries to make a useful contribution to the debates on these problems and shed some light on the mystery of rationality The target audience primarily comprises researchers and experts in the field
