and persuade in everyday life Tracing the word brainwashing from deep in the files of an operative of the U S Office of Strategic Services in the 1950s to the pioneering research of Robert Jay Lifton to the public trials of cult leaders and the case of Patty Hearst Lemov also studies how the idea of mind control has spread across the globe and penetrated courtrooms secret labs military schools and today s digital sites The Instability of Truth offers lessons from mind control episodes past and present Truth is always subject to question in more mundane walks of life than most people believe and Lemov equips us for the increasing challenges we face from social media AI and an unprecedented global form of surveillance capitalism The Instability of Truth develops a rigorous new understanding of both brainwashing s paradoxes and its emotional roots by giving voice to brainwashers the brainwashed and third party observers alike Finance for Normal People Meir Statman,2017 Finance for Normal People teaches behavioral finance to people like you and me normal people neither rational nor irrational We are consumers savers investors and managers corporate managers money managers financial advisers and all other financial professionals The book guides us to know our wants including hope for riches protection from poverty caring for family sincere social responsibility and high social status It teaches financial facts and human behavior including making cognitive and emotional shortcuts and avoiding cognitive and emotional errors such as overconfidence hindsight exaggerated fear and unrealistic hope And it guides us to banish ignorance gain knowledge and increase the ratio of smart to foolish behavior on our way to what we want These lessons of behavioral finance draw on what we know about us normal people including our wants cognition and emotions And they draw on the roles of these factors in saving and spending portfolio construction returns we can expect from our investments and whether we can hope to beat the market Meir Statman a founder of behavioral finance draws on his extensive research and the research of many others to build a unified structure of behavioral finance Its foundation blocks include normal behavior behavioral portfolio theory behavioral life cycle theory behavioral asset pricing theory and behavioral market efficiency **Urgency in the Anthropocene** Amanda H. Lynch,Siri Veland,2018-11-20 A proposal to reframe the Anthropocene as an age of actual and emerging coexistence with earth system variability encompassing both human dignity and environmental sustainability Is this the Anthropocene the age in which humans have become a geological force leaving indelible signs of their activities on the earth The narrative of the Anthropocene so far is characterized by extremes emergencies and exceptions a tale of apocalypse by our own hands The sense of ongoing crisis emboldens policy and governance responses that challenge established systems of sovereignty and law The once unacceptable geoengineering technology for example or authoritarian decision making are now anticipated and even demanded by some To counter this Amanda Lynch and Siri Veland propose a reframing of the Anthropocene seeing it not as a race against catastrophe but as an age of emerging coexistence with earth system variability Lynch and Veland examine the interplay between our new state of ostensible urgency and the means by which this urgency is identified and addressed They examine how societies including Indigenous societies have understood such interplays explore

how extreme weather and climate weave into the Anthropocene narrative consider the tension between the short time scale of disasters and the longer time scale of sustainability and discuss both international and national approaches to Anthropocene governance Finally they argue for an Anthropocene of coexistence that embraces both human dignity and sustainability

Architecture and Movement Peter Blundell Jones, Mark Meagher, 2014-12-17 The experience of movement of moving through buildings cities landscapes and in everyday life is the only involvement most individuals have with the built environment on a daily basis User experience is so often neglected in architectural study and practice Architecture and Movement tackles this complex subject for the first time providing the wide range of perspectives needed to tackle this multi disciplinary topic Organised in four parts it documents the architect s planner s or designer s approach looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it concentrates on the individual s experience and particularly on the primacy of walking which engages other senses besides the visual engages with society and social rituals and how mutually we define the spaces through which we move both by laying out routes and boundaries and by celebrating thresholds analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models drawings film and television The wide selection of contributors include academics and practitioners and discuss cases from across the US UK Europe and Asia By mingling such disparate voices in a carefully curated selection of chapters the book enlarges the understanding of architects architectural students designers and planners alerting them to the many and complex issues involved in the experience of movement

The Dialectical Path of Law Charles Lincoln, 2021-10-13 This book aims to contribute a single idea a new way to interpret legal decisions in any field of law and in any capacity of interpreting law through a theory called legal dialects This theory of the dialectical path of law uses the Hegelian dialectic which compares and contrasts two ideas showing how they are concurrently the same but separate without the original ideas losing their inherent and distinctive properties what in Hegelian terms is referred to as the sublation To demonstrate this theory Lincoln takes different aspects of international tax law and corporate law two fields that seem entirely contradictory and shows how they are similar without disregarding their key theoretical properties Primarily focusing on the technical rules of the Organisation for Economic Co operation and Development OECD approach to international tax law and the United States approach to tax law Lincoln shows that both engage in the Hegelian dialectical approach to law
