Emphasizing the diversity of regional and national models this book explores the history of transformation of family businesses around the world during the twentieth and early twenty first centuries Expert contributors explore place based family capitalism and the local embeddedness of family businesses looking at how and why this family capitalism was transformed during the globalization and de globalization periods in the last century It explores the variation in the adaptations and transformation undertaken by family businesses in response to changes in technology globalization ideology and institutions as well as world wars pandemics and economic crises The book also evaluates the relationship between changes in the internal organization and strategies of family businesses with external forces such as the political ideologies changing ideas about the very nature of what constitutes a family and changes in how the State has perceived families and family businesses in the world The book also shows that despite all profound transformations in family capitalism these businesses have remained resilient entrepreneurial forces and strong creators of wealth and employment This book will be of great interest to readers in business and economic history family business and entrepreneurship **Antimicrobial**

Stewardship for Nursing Practice Molly Courtenay, Enrique Castro-Sánchez,2020-01-30 Drug resistant infections are one of the greatest threats to human health and with resistance on the rise appropriate antimicrobial stewardship AMS is more important than ever This book written by nurses for nurses provides a clear and concise approach to good practice in this vital area Based on published international research by the editors and international experts in AMS this new book explores all aspects of AMS It explains the practices that ensure optimal use of antibiotics for the best clinical outcome with both minimal toxicity to the patient and minimal impact on subsequent antimicrobial resistance The first textbook applied directly to antimicrobial stewardship for nurses it is underpinned by a competency framework endorsed by scientific and professional societies including The National Institute for Health and Care Excellence NICE **A Dream Realised** Ulrike Hill,Zanele Chakela,2020-01-06 How can there be only one dedicated hospital in the country for our children When Madiba asked this question he sowed the seeds of a challenge that would grow into a legacy A seed may be small but its size is disproportionate

to what it can become over time The Nelson Mandela Children s Hospital was a project that seemed impossible when it was just an idea that started with ten people seated around a dinner table As they discussed the state of healthcare in the country and shared their experiences they realised that it was the children of Southern Africa who were the most disadvantaged by the lack of dedicated paediatric facilities At the end of the evening a statement by the late Dr Nthato Motlana took hold and became the catalyst for a remarkable journey I will speak to Nelson he said With South Africa s first democratically elected president Nelson Mandela s backing the board of the Children s Fund was inspired to take up the challenge to address this vital need After years of global research and advice from experts in numerous different fields a Trust was formed to oversee the project and critically to set about raising the one billion rand it would take to build equip and staff a state of the art children s hospital The stories behind the planning for fundraising and building of the Nelson Mandela Children s Hospital are inspiring personal and sometimes heart breaking It was a long and arduous journey beset with difficulties but the dedicated team s commitment and courage prevailed to create a living legacy that will truly impact the lives of children for generations to come Today the Nelson Mandela Children s Hospital in Johannesburg is a proud testimony to a uniquely African story which honours the memory of a great statesman and celebrates the children for whom he cared so deeply

Witchcraft and a Life in the New South Africa Isak Arnold Niehaus,2013 This biography casts new light on scholarly understandings of the connections between politics witchcraft and AIDS in South Africa

Ownership and Governance of Companies Jonathan Michie,Vishnu Padayachee,2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics

Human Health Engineering Jean-Marie Aerts,2020-03-12 In this Special Issue on human health engineering we invited submissions exploring recent contributions to the field of human health engineering which is the technology used for monitoring the physical or mental health status of individuals in a variety of applications

Contributions focused on sensors wearable hardware algorithms or integrated monitoring systems We organized the different papers according to their contributions to the main aspects of the monitoring and control engineering scheme applied to human health applications including papers focusing on measuring sensing physiological variables contributions describing research on the modelling of biological signals papers highlighting health monitoring applications and finally examples of control applications for human health In comparison to biomedical engineering the field of human health engineering also covers applications on healthy humans e g sports sleep and stress and thus not only contributes to develop technology for curing patients or supporting chronically ill people but also more generally for disease prevention and optimizing human well being

Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Dobrochna Bach-Golecka, 2021-05-16 The book discusses compensation mechanisms and other non judicial means that offer alternatives to court proceedings designed and provided for within national legal regimes Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence As such the book focuses on medical malpractice and prospective medical harm from a civil law perspective It examines the contemporary perspective of a patient physician relationship which has evolved from a relation of a quasi patrimonial character into a partnership of quasi equal parties dealing with a medical treatment procedure as a scientific endeavor It also reviews the extra legal conditions that are taken into account in compensation arrangements particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel Lastly the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality based upon standards provided for in international and European law

Explorations in Southern African Drama, Theatre and Performance Patrick J. Ebewo, 2017-05-11 In spite of the rich repertoire of artistic traditions in Southern Africa particularly

in the areas of drama theatre and performance there seems to be a lack of a corresponding robust academic engagement with these subjects While it can be said that some of the racial groups in the region have received substantial attention in terms of scholarly discussions of their drama and theatre performances the same cannot be said of the black African racial group As such this collection of thirteen chapters represents a compendium of critical and intellectual discourses on black African drama theatre and performance in Botswana Lesotho South Africa and Swaziland The topics covered in the book include amongst others ritual practices interventionist approaches to drama textual analyses and the funeral rites viewed as performance of the South African liberation icon Nelson Mandela The discussions are rooted mainly using African paradigms that are relevant to the context of African cultural production The contributions here add to the aggregate knowledge economy of Southern Africa promote research and publication and provide reading materials for university students specialising in the performing arts As such the book will appeal to academics theatre scholars cultural workers and arts administrators arts practitioners and entrepreneurs the tourism industry arts educators and development communication experts
