Section 1: Introduction

Notes and Examples

These notes have sub-sections on:

- [Looking at data](#)
- [Stem-and-leaf diagrams](#)
- [Types of data](#)
- [Measures of central tendency](#)
- [Comparison of measures of central tendency](#)

Looking at data

Most of the ideas introduced in the "Looking at the data" section of the textbook are familiar from GCSE. However some of the terminology may be new to you. Make sure that you know what is meant by the terms:

- **skuller**
- **unimodal distribution**
- **bimodal distribution**
- **symmetrical distribution**
- **uniform distribution**
- **positive skew**
- **negative skew**

(See the glossary if you need to).

Stem-and-leaf diagrams

The problem with grouping data is that the raw data is lost – all you know is the class each item of data fell in. A stem-and-leaf diagram groups the data but keeps the raw data intact.

This data set is the heights of a group of 20 A-level students:

1.65, 1.75, 1.65, 1.75, 1.65, 1.65, 1.65, 1.75, 1.65, 1.75, 1.65, 1.75, 1.65, 1.75, 1.65, 1.75, 1.65, 1.75, 1.65, 1.75

The stems are 1.6, 1.7, 1.8. The second decimal places are used as the leaves.

```

Interactive Knowledge Discovery and Data Mining in Biomedical Informatics Andreas Holzinger,Igor Jurisica,2014-06-17
One of the grand challenges in our digital world are the large complex and often weakly structured data sets and massive amounts of unstructured information This big data challenge is most evident in biomedical informatics the trend towards precision medicine has resulted in an explosion in the amount of generated biomedical data sets Despite the fact that human experts are very good at pattern recognition in dimensions of 3 most of the data is high dimensional which makes manual analysis often impossible and neither the medical doctor nor the biomedical researcher can memorize all these facts A synergistic combination of methodologies and approaches of two fields offer ideal conditions towards unraveling these problems Human Computer Interaction HCI and Knowledge Discovery Data Mining KDD with the goal of supporting human capabilities with machine learning ppThis state of the art survey is an output of the HCI KDD expert network and features 19 carefully selected and reviewed papers related to seven hot and promising research areas Area 1 Data Integration Data Pre processing and Data Mapping Area 2 Data Mining Algorithms Area 3 Graph based Data Mining Area 4 Entropy Based Data Mining Area 5 Topological Data Mining Area 6 Data Visualization and Area 7 Privacy Data Protection Safety and Security

The Basic Practice of Statistics Telecourse Study Guide David S. Moore, 2010-07-27. The Basic Practice of Statistics has become a bestselling textbook by focusing on how statistics are gathered, analyzed, and applied to real problems and situations, and by confronting student anxieties about the course's relevance and difficulties head-on. With David Moore's pioneering data analysis approach emphasizing statistical thinking over computation, engaging narrative, and case studies, current problems, and exercises, and an accessible level of mathematics, there is no more effective textbook for showing students what working statisticians do and what accurate interpretations of data can reveal about the world we live in. In the new edition, you will once again see how everything fits together. As always, Moore's text offers balanced content, beginning with data analysis, then covering probability and inference in the context of statistics as a whole. It provides a wealth of opportunities for students to work with data from a wide range of disciplines and real-world settings, emphasizing the big ideas of statistics in the context of learning specific skills used by professional statisticians.
