**Structural Characterisation of Natural and Industrial Porous Materials: A Manual** Sean Patrick Rigby, 2020-05-15 This book focuses on structural characterisation techniques for porous materials Covering a range of techniques including gas sorption mercury porosimetry thermoporometry NMR and imaging methods this practical guide presents the basic theory behind each characterisation technique and discusses the practicalities of the experimental and data analysis approaches needed for complex industrial samples The book shows readers how to approach characterising a particular sort of material for the first time and then how to develop a strategy for more in depth analysis It also demonstrates how to determine the best techniques for solving particular problems and describes methods of obtaining the required information as well as the limitations of various methods It particularly highlights a scientific approach involving parameter validation and simple acquisition Featuring examples taken from case studies of real world industrial materials this book is intended for industrial practitioners and researchers It provides a manual of potential techniques and answers questions concerning porous materials that arise in areas such as the catalyst industry the oil and gas sector batteries fuel cells tissue engineering scaffolds and drug delivery devices      Optimization of Multistage Hydraulic Fracturing Treatment for Maximization of the Tight Gas Productivity Mengting Li, 2018-12-17 Hydraulic fracturing is essential technology for the development of unconventional resources such as tight gas So far there are no numerical tools which can optimize the whole process from geological modeling hydraulic fracturing until production simulation with the same 3D model with consideration of the thermo hydro mechanical coupling In this dissertation a workflow and a numerical tool chain were developed for design and optimization of multistage hydraulic fracturing in horizontal well regarding a maximum productivity of the tight gas wellbore After the verification a full 3D reservoir model is generated based on a real tight gas field in the North German Basin Through analysis of simulation results a new calculation formula of FCD was proposed which takes the proppant position and concentration into account and can predict the gas production rate more accurately However not only FCD but also proppant distribution and hydraulic connection of stimulated fractures to the well geological structure and the interaction between fractures are determinant for the gas production volume Through analysis the numerical results of sensitivity analysis and optimization variations there is no unique criterion to determine the optimal number and spacing of the fractures it should be analyzed firstly in detail to the actual situation and decided then from case to case      *Analysis and Analyzers* Béla G. Lipták, Kriszta Venczel, 2016-11-25 The Instrument and Automation Engineers Handbook IAEH is the 1 process automation

handbook in the world Volume two of the Fifth Edition Analysis and Analyzers describes the measurement of such analytical properties as composition Analysis and Analyzers is an invaluable resource that describes the availability features capabilities and selection of analyzers used for determining the quality and compositions of liquid gas and solid products in many processing industries It is the first time that a separate volume is devoted to analyzers in the IAEH This is because by converting the handbook into an international one the coverage of analyzers has almost doubled since the last edition Analysis and Analyzers Discusses the advantages and disadvantages of various process analyzer designs Offers application and method specific guidance for choosing the best analyzer Provides tables of analyzer capabilities and other practical information at a glance Contains detailed descriptions of domestic and overseas products their features capabilities and suppliers including suppliers web addresses Complete with 82 alphabetized chapters and a thorough index for quick access to specific information Analysis and Analyzers is a must have reference for instrument and automation engineers working in the chemical oil gas pharmaceutical pollution energy plastics paper wastewater food etc industries About the eBook The most important new feature of the IAEH Fifth Edition is its availability as an eBook The eBook provides the same content as the print edition with the addition of thousands of web addresses so that readers can reach suppliers or reference books and articles on the hundreds of topics covered in the handbook This feature includes a complete bidders list that allows readers to issue their specifications for competitive bids from any or all potential product suppliers
