Menzie D. Chinn,Jeffrey A. Frieden,2012-10-01 A clear authoritative guide to the crisis of 2008 its continuing repercussions
and the needed reforms ahead The U S economy lost the first decade of the twenty first century to an ill conceived boom and
subsequent bust It is in danger of losing another decade to the stagnation of an incomplete recovery How did this happen
Read this lucid explanation of the origins and long term effects of the recent financial crisis drawn in historical and
comparative perspective by two leading political economists By 2008 the United States had become the biggest international
borrower in world history with more than two thirds of its 6 trillion federal debt in foreign hands The proportion of foreign
loans to the size of the economy put the United States in league with Mexico Indonesia and other third world debtor nations
The massive inflow of foreign funds financed the booms in housing prices and consumer spending that fueled the economy
until the collapse of late 2008 This was the most serious international economic crisis since the Great Depression of the
1930s Menzie Chinn and Jeffrey Frieden explain the political and economic roots of this crisis as well as its long term effects
They explore the political strategies behind the Bush administration s policy of funding massive deficits with foreign
borrowing They show that the crisis was foreseen by many and was avoidable through appropriate policy measures They
examine the continuing impact of our huge debt on the continuing slow recovery from the recession *Lost Decades* will long
be regarded as the standard account of the crisis and its aftermath **Dynamics of China's Economy:** Zhiming Long,Rémy
