Mount Kenya University 2015 Law Intake:

Lawyers in 21st-Century Societies Richard L Abel, Ole Hammerslev, Hilary Sommerlad, Ulrike Schultz, 2020-04-02 The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three volume *Lawyers in Society* which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa and former communist countries. These national reports address the impact of globalisation and neoliberalism on national legal professions, the relationship of lawyers and their professional associations to the state and tensions between state and citizenship, changes in lawyer demography, rapidly growing numbers and the profession's efforts to retain control, the entry of women and obstacles to full gender equality, ethnic diversity, legal education, the proliferation of institutions and pedagogic innovation, the regulation of lawyers, structures of production, especially the growth of large firms and the impact of technology and paraprofessionals, the distribution of lawyers across roles and access to justice, state-funded legal aid and pro bono services. The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order. Law, Religion and the Environment in Africa M. Christian Green, Muhammed Haron, 2020-06-03 This volume explores themes of ecotheology, ecofeminism, environmental pollution and degradation, climate change, human and environmental rights, sustainable development, human-animal relations through totem and taboo, sacred sites and spaces and other environmental topics in ways that add immeasurably to the study of African environmentalisms and the interaction of law and religion. In terms of religion, the capability of humans not only to sin and destroy the earth but also to repair and redeem it is very much in evidence across Christianity, Islam and Africa's many indigenous religious and cultural traditions. In terms of law, the need for effective policies and for states and governments to work with indigenous groups and communities towards environmental solutions is also apparent. Queer and Trans African Mobilities B. Camminga, John Marnell, 2022-06-16 Winner ASR Best Africa Focused Edited Collection by the African Studies Review. Recent years have seen increased scholarly and media interest in the cross-border movements of LGBT persons, particularly those seeking protection in the Global North. While this has helped focus attention on the plight of individuals fleeing homophobic or transphobic persecution, it has also reinvigorated racist tropes about the Global South. In the case of Africa, the expansion of anti-LGBT laws and the prevalence of hetero-patriarchal discourses are regularly cited as evidence of an inescapable savagery. The figure of the LGBT refugee, often portrayed as helplessly awaiting rescue, reinforces colonial notions about the continent and its peoples. *Queer and Trans African Mobilities* draws on diverse case studies from the length and breadth of Africa, offering the first in-depth investigation of LGBT

migration on and from the continent The collection provides new insights into the drivers and impacts of displacement linked to sexual orientation or gender identity and challenges notions about why LGBT Africans move where they are going and what they experience along the way

[The Colobines](#) Ikki Matsuda, Cyril C. Grueter, Julie A. Teichroeb, 2022-02-24 The Colobines are a group of Afroeurasian monkeys that exhibit extraordinary behavioural and ecological diversity With long tails and diverse colourations they are medium sized primates mostly arboreal that are found in many different habitats from rain forests and mountain forests to mangroves and savannah Over the last two decades our understanding of this group of primates has increased dramatically This volume presents a comprehensive overview of the current research on colobine populations including the range of biological ecological behavioural and societal traits they exhibit It highlights areas where our knowledge is still lacking and outlines the current conservation status of colobine populations exploring the threats to their survival Bringing together international experts this volume will aid future conservation efforts and encourage further empirical studies It will be of interest to researchers and graduate students in primatology biological anthropology and conservation science Additional online resources can be found at www.cambridge.org/colobines
