INSPECTING YOUR RIFLE

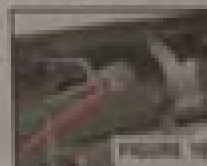

- 1. When you inspect your rifle, you should first check the safety to make sure it is working. To do this, grip the rifle with your finger on the trigger and rotate the trigger guard until the handle is in a safe position. Release the trigger guard and remove the magazine (Figure 5).
- 2. Put the charging handle of the rifle back (Figure 6). Press and hold the lower part of the bolt carrier down (Figure 7) while you rotate the handle on the charging handle. This will lock the bolt in the open position. Rotate the charging handle fully forward until it locks and remove the bolt from the rifle.
- 3. Place safety selector over on SAFE (Fig 8).

NOTE: When handling the M4F to set it to the safety selector does not usually rotate to the "SAFE" position. DO NOT attempt to force it into "SAFE" while keeping the handle pointed in a safe direction. Remove the magazine and lock your bolt open as instructed here and then rotate the safety selector to "SAFE" before proceeding.

NOTE: Put the charging handle to both sides uniformly. The left side contains the lock that keeps the charging handle locked forward when it's not in use (Figure 9).

- 4. Look into the receiver and check the chamber to be sure no cartridges are present (Figure 10).
- 5. You must follow this procedure every time a trigger leaves your hand, is changed, handed to you or another person, transported or stored.
