Abstract

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio (it is stated that "the fact doesn't let an IC radio be constructed by a well-known" within the patent in the radio is irrelevant). The radio without a battery supply can be connected to the antenna terminals. To maximize the life of the microcontroller using the radio conversion to a 100-2000 Hz radio (not stated).

Abstract: The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The physical health assessment included measurements of weight, body mass index (BMI), waist circumference, and blood pressure. The psychological health assessment included measurements of self-esteem, anxiety, and depression. The results of the study showed that the walking program had a significant positive effect on the physical and psychological health of the subjects. The subjects in the walking program had significantly lower BMI, waist circumference, and blood pressure compared to the control group. The subjects in the walking program also had significantly higher self-esteem, lower anxiety, and lower depression compared to the control group. The results of this study suggest that a 12-week, low-intensity, supervised walking program can improve the physical and psychological health of sedentary, middle-aged women.
