## **Emile Durkheim Selected Writings:**

Selected Writings Émile Durkheim, 1972 This is the only collection of Durkheim's writings to draw upon the whole body of his work. Many of the texts in the book are here translated for the first time. Dr Giddens takes his selections from a wide variety of sources and includes a number of items from untranslated writings in the *Revue Philosophique*, *Année Sociologique* and from *L'évolution pédagogique en France*. Selections from previously translated writings have been checked against the originals and amended or retranslated where necessary. Dr Giddens arranges his selections thematically rather than chronologically. However, extracts from all phases of Durkheim's intellectual career are represented, giving the date of their first publication, which makes the evolution of his thought easily traceable. In his introduction, Dr Giddens discusses phases in the interpretation of Durkheim's thought as well as the main themes in his work with an analysis of the effects of his thinking on modern sociology. The book is for students at any level taking courses in sociology, social anthropology and social theory for whom Durkheim is one of the major writers studied.
