Glencoe World Geography Richard G. Boehm, 1995

Why Geography Matters Harm de Blij, 2012-08-17 In recent years our world has seen transformations of all kinds intense climate change accompanied by significant weather extremes deadly tsunamis caused by submarine earthquakes unprecedented terrorist attacks costly wars in Iraq and Afghanistan a terrible and overlooked conflict in Equatorial Africa costing millions of lives an economic crisis threatening the stability of the international system Is there some way we can get our minds around these disparate global upheavals to grasp these events and their interconnections and place our turbulent world in a more understandable light Acclaimed author Harm de Blij answers this question with one word geography In this revised edition of the immensely popular and influential *Why Geography Matters* de Blij tackles topics from the burgeoning presence of China to the troubling disarray of the European Union from the dangerous nuclear ambitions of North Korea to the revolutionary Arab Spring By improving our understanding of the world's geography de Blij shows we can better respond to the events around us and better prepare ourselves to face the global challenges ahead Peppering his writing with anecdotes from his own professional travels de Blij expands upon his original argument offering an updated work that is as engaging as it is eye opening Casual students of geography and professional policy makers alike will benefit from this stimulating and crucial perspective on

geography and the way it shapes our world's events America de Blij warns has become the world's most geographically illiterate society of consequence Indeed despite increasing global interconnectivity and rapid change Americans seem to be less informed and less knowledgeable about the rest of the world than ever In this compelling volume de Blij shows why this dispiriting picture must change and change now

The New Politics of the Textbook Heather Hickman,Brad J. Porfilio,2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology

and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production *World Regional Geography (without Subregions) Loose Leaf* Lydia Mihelic Pulsipher,Alex Pulsipher,2008-03-15 **National Geographic Kids World Atlas** National Geographic Society (U.S.),National Geographic,2013 Presents world regional and thematic maps as well as photographic essays on each continent
