German Naval Camouflage, 1942-1945 Eric Leon, John Asmussen, 2016-09-30 Second in the most complete and authoritative set of books ever written on the color schemes used by the Kriegsmarine throughout World War II Great Models This book completes a highly original and superbly illustrated two volume survey of German naval camouflage and markings in the Nazi era On first publication in 2012 the 1939 1941 volume was quickly recognized by warship enthusiasts and modelmakers as a major step forward in the understanding of a complex and much debated topic It is already considered the standard reference and this second volume is keenly awaited Although a few crucial documents have recently come to light this study is largely based on close scrutiny of all available photos including many newly discovered collated with the first hand testimony of Kriegsmarine survivors After decades of study the authors are probably the world's leading experts and their work challenges many accepted views while greatly expanding the general understanding of the subject The fruits of their labors are presented in the form of exquisite color illustrations of every scheme and variation for which evidence is available This volume covers all major surviving ships down to destroyers from 1942 to the end of the war and adds a new section on torpedo boats While there can never be a last word on such an elusive and poorly documented subject these two volumes will remain the most authoritative work in the field for many years to come Impressive wonderful and indispensable for both historians and modelers or naval wargamers Miniaturas JM

German Naval Camouflage Eric Leon, John Asmussen, 2014-10-30 This book completes a highly original and superbly illustrated two volume survey of German naval camouflage and markings in the Nazi era On first publication in 2012 the 1939 1941 volume was quickly recognised by warship enthusiasts and modelmakers as a major step forward in the understanding of a complex and much debated topic It is already considered the standard reference and this second volume is keenly awaited Although a few crucial documents have recently come to light this study is largely based on close scrutiny of all available photos including many newly discovered collated with the first hand testimony of Kriegsmarine survivors After decades of study the authors are probably the world's leading experts and their work challenges many accepted views while greatly expanding the general understanding of the subject The fruits of their labours are presented in the form of exquisite colour illustrations of every scheme and variation for which evidence is available This volume covers all major surviving ships down to destroyers from 1942 to the end of the war and adds a new section on torpedo boats While there can never be a last word on such an elusive and poorly documented subject these two volumes will remain the most authoritative work in the field for many years to come

The Battleship Scharnhorst Stefan Draminski, 2021-01-21 The Kriegsmarine's Scharnhorst was a German capital ship described either as a battleship or battlecruiser and the lead ship of her class which included one other ship Gneisenau She was launched on 3 October 1936 and completed in January 1939 armed with nine 28cm C 34 guns in three triple turrets She operated with Gneisenau for much of the early portion of World War II including sorties into the Atlantic to raid British

merchant shipping They took part in Operation Weser bung April June 1940 the German invasion of Norway during which they sank the aircraft carrier HMS Glorious and her escort destroyers Acasta and Ardent Scharnhorst also sank HMS Rawalpindi in November 1939 In early 1943 Scharnhorst joined the Tirpitz in Norway to intercept Allied convoys to the Soviet Union On a sortie from Norway to attack a convoy the German force was intercepted by British ships and during the Battle of the North Cape 26 December 1943 HMS Duke of York and her escorts sank Scharnhorst Most of her crew was lost This is the most comprehensive examination of Scharnhorst ever published drawing on new research and technology to tell the full story of the ship It includes a complete set of detailed line drawings with fully descriptive keys and full colour 3D artwork supported by technical details photographs and text on the building of the ship as well as a record of her service history **Naval History** ,2015 World War II Records in the Cartographic and Architectural Branch of the National Archives United States. National Archives and Records Administration,1992 Warships of the Soviet Fleets 1939-1945 Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-10-30 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War

Guide to Federal Records in the National Archives of the United States: Record groups 1-170 United States. National Archives and Records Administration,1995 German Naval Camouflage John Asmussen, Eric Leon, 2012-06-20 For half a century German warship camouflage has been something of a mystery for warship enthusiasts and modelmakers The widespread destruction of naval archives at the end of the war left little documentation while the ad hoc application of unofficial schemes in theatres like Norway led to many variegated and frequently altered patterns This book therefore is based on close scrutiny of all available photos including many only recently discovered collated with the first hand testimony of Kriegsmarine survivors After decades of study the authors are the world s leading experts and their work challenges many accepted views while greatly expanding the general understanding of the subject The fruits of their labours are presented in the form of exquisite colour illustrations of every scheme and variation for which evidence is available For major ships these are sometimes only months apart giving as complete a representation of their camouflage history as possible There are no speculative views if for example only the starboard side is known there is no attempt to reconstruct a port side so all information is reliable This volume covers destroyers and all larger ships during the early war years with a second part devoted to 1942 45 planned for completion in 2013 For warship enthusiasts its publication will be a major event and it is certain to become the standard reference
