Gina Wilson 2013:

Law, Gender Identity, and the Brain Aileen Kennedy, 2023-12-08 This book challenges law's reliance on neurology's brain sex binary. The brain has become the latest candidate in a historical search for a reliable and fixed biological marker of true sex that has permeated every aspect of Western culture including law. As definitions of the sexed and gendered body have become ever more contentious, the development and dissemination of brain sex theories have come to dominate popular understanding of LGBTI identities. But this book argues the brain is no more helpful than earlier biological measures in ensuring just outcomes. Examining how law determines and differentiates male and female in two contested areas of sexed identity through a discussion of Australian cases authorising medical interventions to alter the embodied sex characteristics of transgender minors and intersex minors, the book demonstrates an incoherence in the legal understanding of gender identity development. As the brain too fails as a convincing biological anchor for the binary sex categories of male and female, law must retreat from its aspiration to create, define, and regulate artificially bounded sex categories of male and female. This book will be of great interest to scholars and students in a range of disciplines who are working at the intersection of law, gender, and sexuality.

Thinsanity Glenn Mackintosh, 2019-12-31 We are becoming more and more obsessed with being thin as we get fatter and fatter. The craziest part is that most weight loss solutions are actually part of the problem. Diet and exercise programs fail 97% of people in the long term, resulting in short-term weight loss, medium-term regain, and long-term gain approximately 10 to 15% above starting weight. Scientists have known this reality for decades; the entire diet industry is based on it, yet we keep on falling for promises of fast, easy, permanent weight loss and other fictional tales putting ourselves through rebranded versions of the exact same thing and expecting different results. Some might call this insanity: weight management. Psychologist Glenn Mackintosh calls it Thinsanity. Glenn's book Thinsanity aims to transform the way we approach weight management of the body by starting with the mind. New scientific developments are offering insights into a compassionate way to make peace with food, fall in love with physical movement, and learn to LOVE your body healthy. Glenn takes all those new scientific developments and expresses them the way he does with his clients: clearly and with lots of understanding. This book is right for anyone who wants to learn to love their body and be healthy in it.

How Handedness Shapes Lived Experience, Intersectionality, and Inequality Peter Westmoreland, 2023-03-13 This book delivers philosophy's first sustained examination of handedness: being left-handed, right-handed, etc. It engages literature from phenomenology and continental philosophy, analytic philosophy, laterality studies, cognitive science, and psychology, gender studies, and feminist philosophy, sociology, political science, and more to provide a systematic accounting of the nature of handedness, its basis in lived experience, its effects on bodily performance, its role in varieties of inequality, and its part in oppression and liberation. As a radical asymmetry in the body, handedness plays a key role in human flourishing. It informs both personal bodily movement and social life, from handshakes and high fives to high-tech tools made for one hand or the

other Moreover with left handers making up just 10% of the population handedness presents a significant inequality in lived experience To live and live well we must understand handedness Dying from Improvement Sherene Razack,2015-05-27 No matter where in Canada they occur inquiries and inquests into untimely Indigenous deaths in state custody often tell the same story Repeating details of fatty livers mental illness alcoholic belligerence and a mysterious incapacity to cope with modern life the legal proceedings declare that there are no villains here only inevitable casualties of Indigenous life But what about a sixty seven year old man who dies in a hospital in police custody with a large visible purple boot print on his chest Or a barely conscious alcoholic older man dropped off by police in a dark alley on a cold Vancouver night Or Saskatoon s infamous and lethal starlight tours whose victims were left on the outskirts of town in sub zero temperatures How do we account for the repeated failure to care evident in so many cases of Indigenous deaths in custody In Dying from Improvement Sherene H Razack argues that amidst systematic state violence against Indigenous people inquiries and inquests serve to obscure the violence of ongoing settler colonialism under the guise of benevolent concern They tell settler society that it is caring compassionate and engaged in improving the lives of Indigenous people even as the incarceration rate of Indigenous men and women increases and the number of those who die in custody rises Razack s powerful critique of the Canadian settler state and its legal system speaks to many of today s most pressing issues of social justice the treatment of Indigenous people the unparalleled authority of the police and the justice system and their systematic inhumanity towards those whose lives they perceive as insignificant The SAGE Encyclopedia of Marriage, Family, and Couples Counseling Jon Carlson,Shannon B.
