Ethical and Philosophical Aspects of Nursing Children and Young People Gosia M. Brykczynska, Joan Simons, 2011-01-19

Nurses and healthcare professionals are constantly faced with ethical and philosophical dilemmas when working with children in everyday practice *Ethical and Philosophical Aspects of Nursing Children and Young People* is a comprehensive text on the ethics and philosophy behind paediatric nursing that reflects the contemporary issues encountered while working with children and young people The title provides a philosophical and historical analysis of the subject looking at a review of sociological and political theories concerning the nature of childhood and providing a critical analysis of contemporary notions about childhood It then goes on to look at moral theories and their application to paediatric nursing practice ethical issues when caring for children of all ages from infancy to adolescence It considers issues of disabled children confidentiality mental health issues children's rights and pain management With case studies and activities throughout this book will enable students and newly qualified nurses both to understand philosophical concepts and issues but also to articulate their own reflections and observations on these subjects Written by children's nurses for children's nurses With contributions from internationally recognised experts in the field Reflective scenarios further reading extensive referencing case studies guided questions and resources throughout Includes appendices on the RCPCH Guidelines on Withdrawal of Treatment the ICN Ethical Code the Summary of the UNCRC and the RCPCH Guidelines for the Conduct of Ethical Research [Current Catalog National Library of Medicine \(U.S.\)](#), First multi year cumulation covers six years 1965 70 [National Library of Medicine Current Catalog National Library of Medicine \(U.S.\)](#), 1989 *Ethics in paediatric nursing* Gosia Brykczyńska, 2013-11-11 The idea to write a book on ethical issues pertaining to paediatric nursing has been aired for quite some time The single most significant factor in holding up the creation of such a book was the lack of expertise in one person of all the areas of paediatric nursing The problem was resolved by producing an edited book covering various specialities of paediatric nursing Undoubtedly one could have included more detailed coverage of particular speciality areas e.g chapters on ethical issues surrounding adolescent care child abuse teenage mothers behaviour modification programmes and so on The approach we took however stressed the overall unity of paediatric nursing where the specialities are wide enough to take in all paediatric nursing activities from neonatal care to adolescent health screening I am certainly very aware that the book would not have been written and produced without the support enthusiasm and co operation of the chapter writers I would also especially like to thank Christine Birdsall Nursing Editor at Chapman and Hall and my colleagues at the Charles West School of Nursing Joanna Parkes and Imelda Charles Edwards for their continuing support and my family and friends all of whom bore with me during the last two years **Caring** Gosia M. Brykczyńska, 1997 *Caring The Compassion and Wisdom of Nursing* is a collection of essays that will encourage nurses to consider more deeply what caring means to them to their patients to society and to their profession Aimed at a wide audience of nurses this text is a

valuable resource for all health professionals interested in caring and the arena in which it takes place The authors look at the cultural and historical origins of caring the practical and professional responsibilities that caring involves the personal and professional strengths necessary in order to care and the role that the arts and humanities play in promoting caring sensitivities This unique approach to the subject puts caring into a sharp and clear focus Each chapter requires a different type of reflection and the various approaches together form an interesting picture of both the complexities and simplicities inherent in caring *Whitaker's Books in Print* ,1998 *The British National Bibliography* Arthur James Wells,1999

The Cumulative Book Index ,1990 A world list of books in the English language *The Philosopher's Index* ,2007 Vols for 1969 include a section of abstracts *Nursing* Maya Jolley,2020-09-29 This book uncovers some of the hidden agendas which have inhibited nursing and nurses from making their full potential contribution to health care and stimulates new and positive initiatives It explores nurses behaviour patterns employing psychological educational and political perspectives
