Computer Games As Landscape Art Peter Nelson, 2023-08-31 This book proposes that computer games are the paradigmatic form of contemporary landscape and offers a synthesis of art history, geography, game studies, and play. Like paint on canvas, the game engine is taken as the underlying medium, and using the Valve Source Engine as the primary case study, it analyses landscapes according to the technical, economic, and cultural features this medium affords. It presents the single-player first-person shooter Half-Life 2 as a Promethean safari, examines how the economics of gambling and product placement shaped the eSports landscapes of Counter-Strike, and reveals how sandboxes such as Garry's Mod visualise the radical landscape of Web 2.0. This book explores how our relationship to the environment is changing, how we express this through computer games, and how we can move beyond examining artistic influences on games to examining how historical connections flow through games and the history of landscape images. Against Flow Braxton Soderman, 2021-04-27 A critical discussion of the experience and theory of flow as conceptualized by Mihaly Csikszentmihalyi in video games. Flow as conceptualized by the psychologist Mihaly Csikszentmihalyi describes an experience of being in the zone of intense absorption in an activity. It is a central concept in the study of video games, although often applied somewhat uncritically. In *Against Flow*, Braxton Soderman takes a step back and offers a critical assessment of flow's historical, theoretical, political, and

ideological contexts in relation to video games With close readings of games that implement and represent flow Soderman not only evaluates the concept of flow in terms of video games but also presents a general critique of flow and its sibling play
