water electricity coal and the railways as well as a number of smaller ones Each privatisation involved major challenges in terms of industrial restructuring organising successful sales and in a number of cases establishing effective regulatory regimes The policy evolved and new methods of selling and regulating were put in place that enabled further disposals to occur Monolithic nationalised industries with their emphasis on the benefits of economies of scale vertical integration and rationalisation were replaced by industrial structures rooted in the importance of commercial management risk taking and competition In government departments and parts of the National Health Service direct employees were replaced by private contractors and private investment became a characteristic of public infrastructure in the form of PFI PPP schemes This study draws heavily on the official records of the British government to which the author was given full access and on interviews with the leading figures involved in each of the privatisations including ex ministers civil servants business and City figures as well as academics that have studied the subject This book will of great interest to students of privatisation British political history and of business and economics in general
