Superstar's have long relied on HP technology when creating blockbuster movies, from Disney's *Pirates of the Caribbean* to DreamWorks Animation's *Kung Fu Panda 2* (2011). No wonder your HP Pavilion did not look like an out-of-date piece of hardware when you bought it.

2. **Use of PPE.** The employer must provide PPE to protect the worker from safety hazards. Engineering and technology workers should understand the types of equipment, the theory, the design, the safety features, the maintenance, the use, and the limitations of the PPE. PPE manufacturers are encouraged to meet the U.S. Department of Commerce standards for equipment used in order to help ensure they survive in adverse conditions for high-temperature, humidity, shock, and vibration.¹⁰ Our research also can provide advice to equipment manufacturers concerning the full 360 degrees, rather than the 180 degrees recorded in GRI's study, C.A. to state that the PPE failure begins before the PPE is even used. For example, our study indicates that the failure begins before PPE is even used. The initial performance test, run prior to the use of the PPE, is a failure. The failure is caused by the PPE not being designed to the standards of the U.S. Department of Commerce.
