Hurricane Manuel Ingrid:

Of Rainfalls and Disasters Juan Manuel Rodríguez Esteves , Disasters associated with natural phenomena such as earthquakes floods droughts etcetera are intensifying damages that translate into deaths the loss of infrastructure and the interruption of economic activities The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards leaving society increasingly exposed due to a mismanagement of land Since the 1990s the social sciences have developed the approach of vulnerability which considers the conditions of weakness of a society to cope with hazards We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place The aim of this work is to show how the risk of flood disasters is constructed in Tijuana Baja California with four main elements as our starting point An examination of floods since the late 19th century the voice of the actors present for flooding events a theoretical model to understand the relationship between the hazard and the magnitude of the risk and recommendations for disaster risk management at a local level Disaster Upon Disaster Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03 A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors risk construction complexity of resettlement and importance of peoples culture very little has become protocol and procedure Disaster Upon Disaster illuminates the numerous disjunctions between the suppositions realities agendas and executions in the field goes on to detail contingencies predicaments old and new plights and finally advances solutions toward greatly improved outcomes **Sustainable Development Research and Practice in Mexico and Selected Latin American Countries** Walter Leal Filho, Ricardo Noyola-Cherpitel, Pedro Medellín-Milán, Valeria Ruiz Vargas, 2017-11-27 This book provides an essential overview of sustainable development research in Mexico It discusses the empirical research methods and findings as well as practical initiatives and projects being pursued in Mexico and other countries in the region Although a number of Mexican universities are now conducting high quality research on matters related to sustainable development there are few publications that offer a multidisciplinary overview of research efforts for a broader audience This book addresses that gap in the literature providing researchers at Mexican universities including those from other countries working in Mexico with an opportunity to present their work in curriculum innovations empirical work activities case studies and practical projects As such it fosters the exchange of information ideas and experiences successful initiatives and best practices *Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2018-07-06 In a world of earthquakes tsunamis and terrorist attacks emergency response plans are crucial to solving problems overcoming challenges and restoring and improving communities that have been affected by these catastrophic events Although the necessity for

The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

Navarro, 2020-03-02 In Mexico and across other parts of Latin America local Indigenous peoples have built community policing groups as a means of protection where the state has limited control over and even complicity in crime and violence Luis Hernández Navarro a leading Mexican journalist offers a riveting investigation of these armed self defense groups that sprang up around the time of the 1994 Zapatista uprising in Chiapas Available in English for the first time the book spotlights the intense precarity of everyday life in parts of Mexico Hernández Navarro shows how the self defense response which now includes wealthier rancher and farmer groups is being transformed by Mexico s expanding role in the multibillion dollar global drug trade by foreign corporations extraction of raw minerals in traditionally Indigenous lands and by the resulting social changes in local communities But as Hernández Navarro acknowledges self defense is highly controversial Community

policing may provide citizens with increased agency but for government officials it can be a dangerous threat to the status quo Leftists and liberals are wary of how the groups may be linked to paramilitary forces and vulnerable to manipulation by drug traffickers and the government alike This book answers the urgent call to understand the dangerous complexities of government failures and popular solutions

their varying predicaments and perspectives He then shows through comparable profiles of people across the globe how other North American and international jurisdictions Tokyo Paris Berlin Helsinki Singapore Ireland to name a few are housing their citizens better faster and with determination solutions that could be put into practice here With passion knowledge and vigour Craigie explains how Canada reached this critical impasse and will convince those who may not yet recognize how badly our entire country is in need of change Our Crumbling Foundation provides hope for finding our way out of the crisis by recommending a number of approaches at all levels of government The prescription for how we re going to house ourselves and do so equitably requires not just a business solution nor simply a social solution but rather a combination of both working hand in hand with all levels of government and quickly in order to catch up with and outpace the needs of Canadians in this ever intensifying crisis over a basic human right

WMO Statement on the Status of the Global Climate in .., 2013

The Report: Mexico 2014 Oxford Business Group, 2014-06-06 The second largest economy in Latin America Mexico seems poised to enter a new growth phase as the government of Enrique Pe a Nieto implements radical changes in a number of sectors across the economy The reforms aimed at raising the competitiveness of the Mexican economy have the potential to establish Mexico s position as a regional powerhouse Optimism surrounding the recent wave of reforms coupled with a stable macroeconomic environment and an improved credit rating from international agencies has placed Mexico centre stage Despite slower than anticipated growth of 1.1% in 2013 a wave of reforms affecting a range of sectors is expected to bring a new dynamism to the economy and continue to attract increasing amounts of foreign investment A highly anticipated energy reform approved by Congress in 2013 will for the first time in decades open the nationalised oil industry to foreign investment while a new public private partnership law is set to provide the climate of legal certainty needed to attract private investment in the myriad of sectors undergoing expansion While challenges remain in particular informality and deficient domestic supply chains growth prospects remain positive for the second largest economy in Latin America

Crisis and Migration Anna Lindley, 2014-07-11 Crisis and migration have a long association in popular and policy discourse as well as in social scientific analysis Despite the emergence of more nuanced and even celebratory accounts of mobility in recent years there remains a persistent emphasis on migration being either a symptom or a cause of crisis Moreover in the context of a recent series of headline hitting and politically controversial situations terms like migration crisis and crisis migration are acquiring increasing currency among policy makers and academics Crisis and Migration provides fresh perspectives on this routine association critically examining a series of politically controversial situations around the world Drawing on first hand research into the Arab uprisings conflict and famine in the Horn of Africa cartel violence in Latin America the global economic crisis and immigration crises from East Asia to Southern Africa to Europe the book s contributors situate a set of

contemporary crises within longer histories of social change and human mobility showing the importance of treating crisis and migration as contextualised processes rather than isolated events By exploring how migration and crisis articulate as lived experiences and political constructs the book brings migration from the margins to the centre of discussions of social transformation and crisis illuminates the acute politicisation and diverse spatialisations of crisis migration relationships and urges a nuanced cautious and critical approach to associations of crisis and migration
