

Safety Awareness:

How to Use FrameSAFE Checklists to Improve Jobsite Safety

The FrameSAFE manual was designed as a tool to help your company achieve the goal of providing a safe and healthy work environment for all Employees. This goal can be reached only by everyone working together to promote safe work practices and to maintain property, tools and equipment in a safe operating condition. Every procedure must be a safe procedure. Shortcuts in safe procedures cannot be tolerated.

Safety is everyone's responsibility. These checklists were created to assist in monitoring Employees and building a culture of safety on your jobsites. The goal of these checklists is to identify and correct safety infractions as quickly as possible, and that in some cases (as noted in the Stop & Fix Checklist) work is halted while the situation is corrected.

Suggestions for Using the Stop & Fix Checklist:

- Share the Checklist with all jobsite supervisors, foremen to training operations (i.e., GCs, subcontractors, etc.) and other leaders, and set an expectation for compliance.
- Laminate copies of the Checklist and post them in prominent places on your jobsites (e.g., entrances to the building, egress areas, break area, etc.).
- Add the expectations of the items on the Checklist to your jobsite orientation meetings. Explain the importance of the "stop & fix" items to general jobsite safety.
- Plan a Toolbox Talk or safety meeting to review the contents of and expectations about the Checklist at a regular interval.

Suggestion for Using the Audit Checklist:

- Share the Checklist with your safety director or other supervisor/foreman in charge of safety compliance and set an expectation for compliance.
- Consider sharing the Checklist with GCs and stating how often the audit will be performed.
- Use the results of the audit process to customize your ongoing safety training plans, including Toolbox Talks available with the FrameSAFE program. Documentation of weekly training is key to ongoing safety compliance.

NOTE: The Safety Awareness Audit and Safety Awareness Stop & Fix Checklists were created to assist you in monitoring the subscriber's adherence to the FrameSAFE program on your jobsites. FrameSAFE is based on OSHA's 1926 Standard. Therefore, while you may add additional and/or more specific items to the list to further your safety efforts, the National Framers Council recommends that you not delete any checklist item in order to maintain OSHA compliance.
