How your net energy compares to other homes with solar

Net energy is the difference between the amount of electricity your solar panels produce and the amount of gas and electricity you use. Efficient homes with solar are the title of honor in your comparison group with the lowest net energy.

Net energy is a common measurement of electricity (kWh) and gas (therms) use.

How does this comparison work?

We use your home profile to look for 100 single-family homes with solar in your area that have a similar heating source and square footage. If your report seems off, you can take the Home Energy Survey to make it more accurate.

You can take the Home Energy Survey now at utilityco.com/homeenergy

Your net energy at a glance

Use this report to learn about your net energy and how you can save even more.

Mar 20 - Apr 21, 2023

Your solar panels produced **more** energy than you used!

Your net energy was **higher** than similar homes.

Take the UtilityCo Home Energy Survey

Your net energy compared to last year

What could have caused your net energy to increase?

Your household energy use may have increased. Changes in your solar production may also have contributed.

Top recommended tip for you

Clean your refrigerator coils

Only in July refrigerators will cause your fridge to work harder and use more energy. Vacuum the coils once a year and leave three inches of space between your fridge and the wall to allow heat to escape.

Save up to \$100 per year!

Don't forget the power of energy efficiency

Smart power strips, smart homes, smart vehicles—low-energy-saving technologies are everywhere. To make the technology, good energy efficiency habits will ensure you get the most out of your solar investment all year long.

Stay mindful of your electricity use—turn off lights, electronics, and power strips when they're not in use.
