**Africa's Gene Revolution** Matthew A. Schnurr, 2019-11-07 As development donors invest hundreds of millions of dollars into improved crops designed to

alleviate poverty and hunger Africa has emerged as the final frontier in the global debate over agricultural biotechnology The first data driven assessment of the ecological social and political factors that shape our understanding of genetic modification Africa s Gene Revolution surveys twenty years of efforts to use genomics based breeding to enhance yields and livelihoods for African farmers Matthew Schnurr considers the full range of biotechnologies currently in commercial use and those in development including hybrids marker assisted breeding tissue culture and genetic engineering Drawing on interviews with biotechnology experts alongside research conducted with more than two hundred farmers across eastern western and southern Africa Schnurr reveals a profound incongruity between the optimistic rhetoric that accompanies genetic modification technology and the realities of the smallholder farmers who are its intended beneficiaries Through the lens of political ecology this book demonstrates that the current emphasis on improved seeds discounts the geographic social ecological and economic contexts in which the producers of these crops operate Bringing the voices of farmers to the foreground of this polarizing debate Africa s Gene Revolution contends that meaningful change will come from a reconfiguration not only of the plant s genome but of the entire agricultural system African Economic Development

Christopher Cramer, John Sender, Arkebe Oqubay, 2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries Its starting point is the striking variation in African economic performance Unevenness and inequalities form a central fact of African economic experiences The authors highlight not only differences between countries but also variations within countries differences often organized around distinctions of gender class and ethnic identity For example neo natal mortality and school dropout have been reduced particularly for some classes of women in some areas of Africa Horticultural and agribusiness exports have grown far more rapidly in some countries than in others These variations and many others point to opportunities for changing performance reducing inequalities learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past The book rejects teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment **Prioritizing Development** Bjorn Lomborg, 2018-06-07 This book is a unique guide to making the world a

better place Experts apply a critical eye to the United Nations Sustainable Development agenda also known as the Global Goals which will affect the flow of 2.5 trillion of development aid up until 2030 Renowned economists led by Bjorn Lomborg

determine what pursuing different targets will cost and achieve in social environmental and economic benefits There are 169 targets covering every area of international development from health to education sanitation to conflict Together these analyses make the case for prioritizing the most effective development investments A panel of Nobel Laureate economists identify a set of 19 phenomenal development targets and argue that this would achieve as much as quadrupling the global aid budget

**The Three Regularities in Development** Moazam Mahmood,2018-06-06 The financial crisis in advanced economies and its impact on developing countries has put the longer term agenda of development structural transformation of countries of their growth jobs poverty and distribution on the analytic and policy backburner Day to day management of macro fundamentals in the global economy and the labour market have consumed decision makers with faltering GDP growth soaring unemployment and a resurgent threat of deflation Without understanding and addressing the structural constraints and imbalances underpinning such global problems the world economy is doomed to experience an increasing number of crises and emerging dualisms between countries The aim of this book is to bring back a balance to the development debate by re focusing on the structural development challenges faced by developing countries The book develops a coherent analytical framework supported by a large body of new empirical evidence linking three core dimensions the structure of growth employment and their macro drivers Then for each of these dimensions and relationships a variety of effective policies are also identified and elucidated with the added granularity of country cases

**Global Visions of Violence** Jason Bruner,David C. Kirkpatrick,2022-12-09 In Global Visions of Violence the editors and contributors argue that violence creates a lens bridge and method for interdisciplinary collaboration that examines Christianity worldwide in the twentieth and twenty first centuries By analyzing the myriad ways violence persecution and suffering impact Christians and the imagination of Christian identity globally this interdisciplinary volume integrates the perspectives of ethicists historians anthropologists and ethnographers to generate new conversations Taken together the chapters in this book challenge scholarship on Christian growth that has not accounted for violence while analyzing persecution narratives that can wield data toward partisan ends This allows Global Visions of Violence to push urgent conversations forward giving voice to projects that illuminate wide and often hidden landscapes that have been shaped by global visions of violence and seeking solutions that end violence and turn toward the pursuit of justice peace and human rights among suffering Christians
