Urban Geography in South Africa Ruth Massey, Ashley Gunter, 2019-08-17 This book embraces South Africa and its place in the Global South providing a succinct theoretical and empirical analysis and discussion of urban issues in the country There have been sporadic calls from the Urban Geography community for the development of an overarching and comprehensive text that explores contemporary processes and practices taking place in urban South Africa and more widely the Global South This is an edited collection of chapters by leading urban theorists and practitioners working on various themes within urban South Africa and serves as a base for scholars and students interested in urban perspectives from countries in the Global South

From Local Action to Global Networks: Housing the Urban Poor Peter Herrle, Astrid Ley, 2016-03-09 Over the past two decades it has become widely recognized that housing issues have to be placed in a broader framework acknowledging that civil society in the form of Community Based Organizations CBOs and their allies are increasingly networking and emerging as strong players that cannot easily be overlooked Some of these networks have crossed local and national boundaries and have jumped political scales This implies that housing issues have to be looked at from new angles they can no longer simply be addressed through localized projects but rather at multiple scales The current debate is largely limited to statements about the relevance of individual organizations for local housing processes and tends to overlook the innovativeness in terms of re scaling those processes and of influencing institutional change at various levels by transcending national boundaries There is a significant lack of a systemic understanding of such globally operating grassroots networks and how they function in the housing process This book brings together different perspectives on multi scalar approaches within the housing field and on grassroots engagement with formal agencies including local government higher levels of government and international agencies By moving away from romanticizing local self initiatives it focuses on understanding the emerging potential once local initiatives are interlinked and scaled up to transnational networks

The State of African Cities, 2014 United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
