

These installation instructions are intended for use by Qualified Installers.

### STEP 3: PREPARE WATER SUPPLY CONNECTION

Make sure the house water supply is turned off before connecting the dishwasher water lines.

1. This dishwasher must be connected to a hot water supply between 120°F (49°C) and 149°F (65°C). This temperature range provides the best washing results and shortest cycle time. To prevent damage to dishes, temperature should not exceed 149°F (65°C).
2. When connecting the dishwasher water line, sealing tape or compound should be used on pipe threads to avoid leaks. Tape or compound should not be used on compression fittings.
3. The water supply tube must be located in the left side channel as shown in the figure.

#### NOTE

The instructions for appliances connected to the water mains by detachable hose-sets shall state that the new hose-sets supplied with the appliance are to be used and that old hose-sets should not be re-used.

FIG. 5

### STEP 4: PREPARE THE DISHWASHER

FIG. 6

Remove the rear plastic shipping brace for clearance and ease of installation.

#### WARNING

Don't pull or lift with the handle; doing so can damage the door and hinges. Open door and grab body frame and top front opening of tub...

FIG. 7

Never move the dishwasher by the handle. This can cause damage to the dishwasher.

FIG. 8

Always move the dishwasher by gripping the top frame.
