A remarkable fifteen Nordic family businesses are among the 500 biggest companies in the world and the Nordic countries have more dynasties than most others per capita and in GDP terms The willingness often reluctant of both the political system and labour movement to accept asset accumulation has helped these Nordic businesses survive The top 1% of Swedes own close to 25% of the country s wealth as opposed to 16 5% of Spaniards where dynasties are also abundant The pattern has held a firm grip on the Nordic countries since the Industrial Revolution and emergence of free enterprise The trend is particularly pronounced in comparison with the Anglo Saxon countries somewhat less so relative to places like Italy Japan Germany and South Asian countries This book describes the factors and dynamics behind the ability of Nordic businesses to grow and thrive from one generation to the next in the process of becoming dynasties Far from being commercial enterprises they are

a venue for power philanthropy passion conflict freedom and captivity Like many other dynasties the Nordic ones are a witch s brew of Machiavelli s Prince Marx s belief in the potential of the meritocracy and Smith s baker who works to sustain his family Topped by a spoonful of Weber s Protestant Ethic This book will be key readings for students and scholars of entrepreneurship corporate governance business history Scandinavian history family business and enterprises and the related disciplines
