Choice, 2007-03 *Completing a Professional Practice Dissertation* Jerry W. Willis, Ron Valenti, Deborah Inman, 2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers Professional doctorates such as the Doctor of Nursing Practice DNP Doctor of Education EdD Doctor of Pharmacy PharmD Doctor of Professional Studies DProf or DPS and the Doctor of Psychology PsyD are in fact just a few of the professional doctorates being offered today Professional doctorates are the

fastest growing segment of doctoral education The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations This book was written specifically for students and faculty involved in professional practice dissertation work It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in research doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs For example negotiating entry into applied settings and securing the cooperation of practicing professionals is covered as are alternative models for the dissertation e g the three article dissertation or TAD The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research This book written by three experienced mentors of professional practice dissertation students is the comprehensive guide for both students and faculty

Positive leadership and worker well-being in dynamic regional contexts Martijn Burger, Martine J. H. Coun, Jol Stoffers, Steven Van Den Heuvel, Thomas Van Waeyenberg, Arne Vanderstikken, 2024-01-19 *Careers and Talent Management* Cristina Reis, 2015-12-07 *Careers and Talent Management* challenges and deconstructs the notion of the perfect

career in order to provide new perspectives on talent management and career creation It argues that the skills that organizations typically look for as indicative of superstar performance are not necessarily those that lead to competitive advantage Attracting and retaining talent is both challenging and complex for organizations since it is not known especially at the top level which employee skills will be most valuable in helping the organization be competitive globally In this thoughtful book Reis bucks the trend on emerging super talents critically analyzing topics related to the field of general management careers and talent management such as leadership entrepreneurship gender and diversity to demonstrate the range of employee skills that can benefit an organization globally Chapter focuses include global entrepreneurship remote business practices and social responsibility These new perspectives on talent management will help students of human resource management think critically about the implications of pursuing or encouraging a perfect career trajectory
