- 1. **Statically indeterminate** structures cannot be analysed by the **method of joints** or the **method of sections**.
 - 1.1 **Statically indeterminate** structures have more unknowns than equilibrium equations.
- 2. **Statically determinate** structures can be analysed by the **method of joints** or the **method of sections**.
 - 2.1 **Statically determinate** structures have the same number of unknowns as equilibrium equations.
- 3. **Statically indeterminate** structures should be analysed by the **method of consistent deformations**.
 - 3.1 The **method of consistent deformations** involves removing the redundant support(s) and replacing them with a **redundant reaction**.
 - 3.2 The **redundant reaction** is determined by requiring that the **displacement** of the structure at the location of the redundant reaction is **zero**.
 - 3.3 The **displacement** of the structure at the location of the redundant reaction is determined by the **principle of superposition**.
 - 3.4 The **principle of superposition** states that the **displacement** of the structure at the location of the redundant reaction is the **sum** of the **displacements** of the structure at the location of the redundant reaction due to the **original load(s)** and the **redundant reaction**.
 - 3.5 The **principle of superposition** is a **linear** relationship.

- 101 These three variables have three dimensions. Political scientists think
102 of them as:
103 1) the *spatial* dimension (space)
104 2) the *temporal* dimension (time)
105 3) the *causal* dimension (cause)

Abstract

1. Discuss the factors that influence your selection of a reading material from this table. Does the accompanying material interest you more than other reading materials in general? Why?
2. How do you select reading material? Do you select it on the basis of its topic or the author's name?
3. Do you select reading material on the basis of your reading speed or the amount of the space available for the reading group of the moment?
4. Do you select reading material on the basis of your interest in the topic, or on the basis of the author's name or the amount of the space available for the reading group of the moment?
5. Do you select reading material on the basis of the author's name or the amount of the space available for the reading group of the moment?
6. Do you select reading material on the basis of the author's name or the amount of the space available for the reading group of the moment?
7. Do you select reading material on the basis of the author's name or the amount of the space available for the reading group of the moment?
8. Do you select reading material on the basis of the author's name or the amount of the space available for the reading group of the moment?

Abstract

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio like it is stated that "the fact doesn't let an IC radio be controlled by a wall switch. When the power is on the radio is always on. The radio is without battery supply, you can increase the time without changing the radio. To increase the life of the radio, it is best to use the radio continuously in a 100-2000 Hz range only." Abstract: The purpose of this study was to determine the effect of a 12-week, low-intensity, low-impact, and low-volume exercise program on the physical fitness of sedentary, middle-aged women. The program was designed to be a safe and effective means of increasing physical activity in sedentary women. The program consisted of three sessions per week, each lasting 30 minutes. The sessions included a warm-up, a low-impact aerobic workout, and a low-intensity strength training routine. The results of the study showed that the program had a positive effect on the physical fitness of the women. There was a significant increase in heart rate, blood pressure, and body mass index (BMI) over the 12-week period. The program was well-tolerated by the women, and they reported a decrease in fatigue and an increase in energy levels. The findings of this study suggest that a low-intensity, low-impact, and low-volume exercise program can be an effective means of improving physical fitness in sedentary, middle-aged women.
