Passionate Views Carl Plantinga, Greg M. Smith, 1999-04-23 The movie theater has always been a place where people come together to share powerful emotional experiences from the fear generated by horror films and the anxiety induced by thrillers to the laughter elicited by screwball

comedies and the tears precipitated by melodramas. Indeed the dependability of movies to provide such experiences lies at the center of the medium's appeal and power. Yet cinema's ability to influence even manipulate the emotions of the spectator is one of the least explored topics in film theory today. In *Passionate Views* thirteen internationally recognized scholars of film studies philosophy and psychology explore the emotional appeal of the cinema. Employing a novel cognitive perspective the volume investigates the relationship between genre and emotion explores how film narrative music and cinematic techniques such as the close up are used to elicit emotion and examines the spectator's identification with and response to film characters. An impressive range of films and topics is brought together by Carl Plantinga and Greg M. Smith including the success of *Stella Dallas* and *An Affair to Remember* as tearjerkers the power of *Night of the Living Dead* to inspire fear and disgust the sublime evoked in *The Passion of Joan of Arc* *Aguirre the Wrath of God* and *The Children of Paradise* the emotional basis of film comedy as seen in *When Harry Met Sally* the use of cinematic cues in *Raiders of the Lost Ark* and *Local Hero* to arouse emotions the relationship between narrative flow and emotion in *Once Upon a Time in the West* and *E.T.* the emotive use of music in *The Elephant Man* and *A Clockwork Orange* *Stranger than Paradise*'s sense of timing desire and resolution in *Casablanca* audience identification with the main characters in *Groundhog Day* and *The Crying Game* portrayal of perversity in *The Silence of the Lambs* *Flaming Creatures* and *Shivers* and empathy elicited through closeups of actors' faces in *Yankee Doodle Dandy* and *Blade Runner*. *Passionate Views* offers a new approach to our understanding of film and will be of interest to anyone fascinated by the emotional power of motion pictures and their relationship to the central concerns of our lives as well as by the techniques filmmakers use to move an audience.

The Life and Theology of Alexander Knox David McCready, 2020-06-02 In his *The Life and Theology of Alexander Knox* David McCready highlights one of the most important figures in the history of Anglicanism. A disciple of John Wesley Knox presents his mentor as a representative of the Neo Platonic tradition within Anglicanism a tradition that Knox himself also exemplifies. Knox also significantly impacted John Henry Newman and the Tractarians. But Alexander Knox is an important theologian in his own right one who engaged substantially with the main intellectual currents of his day namely those stemming from the Enlightenment and Romanticism. Meshing Knox's theological teaching on various topics with details of his life this book offers a fascinating portrait of a man who in the words of Samuel Taylor Coleridge changed the minds and with them the acts of thousands.

Body and Earth Andrea Olsen, 2020-02-04 *Body* is our first environment writes Andrea Olsen. It is the medium through which we know the earth. In a remarkable integration of environmental science biology meditation and creative expression Olsen a dancer who teaches in the environmental studies program at Middlebury College offers a guide to a holistic understanding of person and place. Part workbook part exploration *Body and Earth* considers the question of how we can best most responsibly inhabit both our bodies and our planet. Olsen displays an easy command of fields as diverse as geology biochemistry ecology and anatomy as she explores the ways in which our bodies are derived from and connected to

the natural world But Body and Earth is not just a lesson it is also an investigation Arranged as a 31 day program the book offers not only a wealth of scientific information but also exercises for both exploring the body and connecting with place illustrations and works of art that illuminate each chapter s themes and Olsen s own meditations and reflections connecting the topics to her personal history and experience Olsen insists that neither body nor landscape are separate from our fundamental selves but in a culture which views the body as a mechanism to be trained and the landscape as a resource to be exploited we need to learn to see again their fundamental wholeness and interconnection Through hard data reflection exercises and inspiration Body and Earth offers a guide to responsible stewardship of both our planet and our persons

Antiquarian Bookman ,1960 **The Naked And The Undead** Cynthia Freeland,2018-03-05 Horror is often dismissed as mass art or lowbrow entertainment that produces only short term thrills Horror films can be bloody gory and disturbing so some people argue that they have bad moral effects inciting viewers to imitate cinematic violence or desensitizing them to atrocities In The Naked and the Undead Evil and the Appeal of Horror Cynthia A Freeland seeks to counter both aesthetic disdain and moral condemnation by focusing on a select body of important and revealing films demonstrating how the genre is capable of deep philosophical reflection about the existence and nature of evil both human and cosmic In exploring these films the author argues against a purely psychoanalytic approach and opts for both feminist and philosophical understandings She looks at what it is in these movies that serves to elicit specific reactions in viewers and why such responses as fear and disgust are ultimately pleasurable The author is particularly interested in showing how gender figures into screen presentations of evil The book is divided into three sections Mad Scientists and Monstrous Mothers which looks into the implications of male rationalistic scientific technology gone awry The Vampire s Seduction which explores the attraction of evil and the human ability or inability to distinguish active from passive subject from object and virtue from vice and Sublime Spectacles of Disaster which examines the human fascination with horror spectacle This section concludes with a chapter on graphic horror films like The Texas Chainsaw Massacre Written for both students and film enthusiasts the book examines a wide array of films including The Silence of the Lambs Repulsion Frankenstein The Fly Dead Ringers Alien Bram Stoker s Dracula Interview with the Vampire Frenzy The Shining Eraserhead Hellraiser and many others **The Art and Science of Making the New Man in Early 20th-Century Russia** Yvonne Howell,Nikolai Kremmentsov,2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to

pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind
