Q1. Read the following passage and answer the questions that follow:

Warning came too late or not at all last December. The count of dead and missing numbered 30,000 and millions more have lost homes and livelihoods in the wake of the earthquake generated tsunami that struck more than a dozen countries throughout the Indian Ocean. Many of the communities hit, had virtually no memory of a powerful tsunami or what the warning signs of an approaching one would be the last ocean wide wave from the issue of Krakatau off southern Sumatra, occurred in 1883. Lacking that knowledge and any kind of detection or warning systems in the Indian Ocean coastal areas were defenseless against the waves. With tectonic plates groaning against each other by pulling apart in every ocean floor, the risks of large submarine quakes resulting tsunamis have galvanized scientists and planners to prepare for the next onslaught. Since 1992, 17 major tsunamis have struck, 11 in the Pacific. Fatalities were relatively low, a total of some 4,000-until last year. To forestall another catastrophe, world leaders have announced plans for tsunami detection and warning systems in the Indian Ocean. The existing network of underwater sensors in the Pacific site of 85% of all tsunamis will be increased and expanded into the Atlantic and Caribbean. Environmentalists are pushing for a further line of defence planting more mangrove forests as wave barriers. Early warning systems and more coastal vegetation might have been saved many of the 1800 victims drowned or crushed by debris in Khao Lak, Thailand.

Almost two hours passed from the time the quake occurred until the wall of water tore through hotels and huts there. Amid the rubble Kusol Weditchakul, prayed for his missing sister, believed swept away by the unstoppable water.

(i) The word "forestall" here means:

- a) predict b) prevent c)warn d)anticipate

(ii) Do you think people still remember the earthquake generated tsunami? (Yes/No)
