Discourse Perspective of Geometric Thoughts Sasha Wang, 2016-03-22 Sasha Wang revisits the van Hiele model of geometric thinking with Sfard's discursive framework to investigate geometric thinking from a discourse perspective. The author focuses on describing and analyzing pre-service teachers' geometric discourse across different van Hiele levels. The explanatory power of Sfard's framework provides a rich description of how pre-service teachers think in the context of quadrilaterals. It also contributes to our understanding of human thinking that is illustrated through the analysis of geometric discourse accompanied by vignettes. Entertainment Computing - ICEC 2015 Konstantinos Chorianopoulos, Monica Divitini, Jannicke Baalsrud Hauge, Letizia Jaccheri, Rainer Malaka, 2015-09-24 This book constitutes the refereed proceedings of the 14th International Conference on Entertainment Computing ICEC 2015 held in Trondheim, Norway, in September-October 2015. The 26 full papers, 6 short papers, 16 posters, 6 demos, and 6 workshops/tutorial descriptions presented were carefully reviewed and selected from 106 submissions. The multidisciplinary nature of Entertainment Computing is reflected by the papers. They focus on computer games, serious games for learning, interactive games design and evaluation methods for Entertainment Computing, digital storytelling, games for health and well-being, digital art and installations, artificial intelligence and machine learning for entertainment, interactive television and entertainment, *Intelligent Tutoring Systems* Barry P. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal. ITS 88 was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996. ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it's only been two years, not four, since the last one. One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization, e.g., IEEE or AACE. Rather, the founder of these conferences, Claude Frasson, started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues. Thus, the unifying theme is science. This year's hot topics differ from those in the earlier ITS conferences as they reflect ever-changing trends in ITS research. A few of the issues being examined at ITS 98 include Web-based tutoring systems, deploying ITS in the real world, tutoring and authoring tools, architectures and knowledge structure, and representation. **Math Connection™, Grade 4**, 2012-09-01 Providing focused practice to promote and foster math skills outlined by the NCTM, each workbook is grade level appropriate with clear examples and easy to understand instructions on each page to reinforce the lesson.
